Rift in Military Poses Threat To Stability Before Plebiscite

By Michael Richardson and Herold Tribune

MANILA — Troops loyal to the overnment of President Corazon C. Aquino fired tear gas Wednesday night into a broadcasting complex in an unsuccessful attempt to flush out about 150 rebellious soldiers who occupied the building during a coup attempt Tuesday. But military commanders held

back from launching a full-scale armed assault against the rebels, the last of about 500 soldiers who had tried to take over bases and communication centers in and around Manila.

Military sources and Western analysts said commanders feared that further fighting and bloodshed between breakaway soldiers and units loyal to the government of Mrs. Aquino would aggravate po-litical divisions in the armed forces and undermine her government.

The analysis also said the handling of the rebels was a measure of the personal authority of General Fidel V. Ramos, the armed forces chief of staff, and of the effective-

after more than 24 hours of negotiations failed to produce a peaceful

In a meeting early Wednesday with the rebel leader, General Ramos warned that the rebel troop action was "weakening the country for a Communist takeover.

But the officer, Colonel Oscar Canlas, an air force intelligence officer who maintains that the Aquino government is neglecting hands of the outlawed Communist movement, refused to obey the order, saving he needed more time to consult his men.
As night fell, about 2,000 heavily

armed government troops in full battle gear ringed the broadcasting center and sealed off surrounding

"The last thing they want is more bloodshed," said a foreign diplomat. "It would have a very serious He said government soldiers had been disturbed Tuesday when they had to fire on fellow troops who

Reported Near In Trade Dispute

U.S.-EC Accord

Key Question Settled on U.S. Compensation

By Peter Maass

BRUSSELS - Senior negotiators from the European Community and the United States were on the verge of an agreement Wednes-day night that would resolve the major trade dispute over U.S. grain exports to Spain, sources said.
The two sides had settled the key

question, of compensation for U.S. farmers, and were nearing agreement on industrial trade-offs and the duration of the pact, according

"We're in good shape," said a U.S. source. Asked if a pact could be reached before Thursday morning, he replied, "It wouldn't sur-

The virtually nonstop negotiations began Monday evening.
The frantic negotiations, conducted by telephone between Brussels and Washington, were being led by Willy de Clercq, the EC commissioner for external rela-tions, and Clayton K. Yeutter, the U.S. special trade representative.

An accord would avert a potenwhich is 200 years old this year.

The United States, he said, quoting Benjamin Franklin, "is a rising and not a setting sun." It was a to hamper General Agreement of typical Reagan rhetorical device, Tariffs and Trade, or GATT, talks on liberalizing world trade, stems from grain levies imposed by Spain

as part of its entry into the EC lest The United States has claimed it unjustifiably lost \$430 million anmustly in grain sales because of the tariffs. Washington has set a dead-line of Friday for the EC to agree on a package of agricultural and industrial compensation, after which it would impose prohibitive duties of 200 percent on such EC imports as white wine, cheese and

certain alcoholic spirits. The EC has vowed to respond other factors, has stymied the with anti-U.S. measures, notably White House. He was unable be- tough tariffs on corn-ghiten feed. Trade experts have said that ample, to provide details of what is these moves — affecting nearly \$1 emerging as the major domestic po-billion in two-way trade — could licy initiative, insurance against lead to spiraling retaliatory actions. But in recent days the community has appeared to back down from

Clayton K. Yeutter

position. When the dispute broke out a year ago, the EC refused to offer any long-term agricultural

Trade sources said the two sides agreed Wednesday that the EC would allow non-community countries to sell between two million metric tons (2.2 million short tons) and two and one-half million metric tons of corn in Spain every year. Most of that quota, about 1.8 million tons, would go to U.S. farmers.

The sources also said that the EC reed to allow slightly more than 200,000 metric tons in annual sorghum sales to Spain, as well as several hundred thousand metric tons of coarse grain sales to Portu-gal. The United States would re-

ceive most of those quotas. However, the sources said, the two sides had not settled the question of industrial trade-offs. According to the sources, the EC agreed to lower duties on about \$150 million of U.S. industrial goods, but Washington was de-usanding deeper tariff cuts than the EC was offering.

The sides also were said to be at odds over the agreement's duration. The EC wants the quota guar-antees to expire after four years. the sources said, while the United States is seeking long-term assur-

proved by the EC's 12 member na tions. A special meeting of their representatives is scheduled for Thursday afternoon. Although there could be some grumbling, ob-servers said, it was highly unlikely that the EC members would turn down a negotiated agreement. U.S. Criticized

Michel Noir, France's trade minister, severely criticized the Reagan dministration Wednesday for its "aggressive" approach to the EC during the dispute, and told The International Herald Tribune that it would have lasting repercussions on relations between the commun ty and the United States.
The Americans handled them-

selves very badly in this dispute, by being so aggressive in their tactics." Mr. Noir said, speaking of Mr. colm Balridge and Agriculture Sec-retary Richard E. Lyng.

"What they did not realize was that rather than dividing us, as they hoped, they in fact drew us together, creating greater European soli-darity," Mr. Nois said. "The U.S. negotiators were very

blunt: it was a matter of taking it or leaving it," he said, adding that "the U.S. was being totally contradictory, because they want our sup-port for the new GATT negotiations, yet in this dispute they simply brushed aside the rules of GATT, which we are all committed

Reagan's Address to Nation Cites 'Mistakes' on Iran

He Offers to Cooperate With Congress the military budget while resisting

By David Hoffman

President Rejected 'a Fighting Speech'

By R.W. Apple Jr.
New York Times Service

WASHINGTON - President Ronald Reagan has produced a State of the Union message that he could have delivered, with only modest changes, if his party had won the Senate elections in Noember and if the Iran-contra affair had never developed.

Sensing that Mr. Reagan had been weakened by the Republicans' loss of the Senate, the uproar over arms sales to Iran and the diversion of some of the profits to the Nicaraguan rebels, many of his supporters had hoped that the president would go to Capitol Hill on Tuesday night "with blood in his eye and make a fighting speech," in the words of Senator William L. Armstrong, Republican of Colora-

Japanese Shift Tactics on U.S. Bonds Borrowed Dollars

Underwrite Deficit By Carl Gewirtz

International Herald Tribune PARIS — Japan, which since 1985 has been financing a quarter to a third of the U.S. deficit through the purchase of U.S. Treabonds, radically altered the way it financed these holdings starting in mid-1986, the Bank for International Settlements reported

Wednesday. The BIS, the Basel-based clearing house for such data, reported a huge increase in dollar borrowing by Japanese banks in the thir quarter, the latest period for which data are available, indicating that they were using borrowed dollars than selling yen to purchase dol-

Such a shift in strategy has two implications. By eliminating the exchange-rate step of selling yen to buy dollar securities, Japanese in-vestors contributed to the strengthening of their currency by reducing the demand for dollars in foreignexchange markets.

The data show that the dollar raded in a range of about 155 year in the third quarter. This was down from a range of from 160 to 180 in the previous quarter and an average of about 165 yen in the final quarter, after Washington and Tokyo agreed to stabilize the rate.

More importantly, the financin shift also appears to have increased the vulnerability of the U.S. bond market to a withdrawal of Japanese funds. If the dollar borrowing costs tral government and will require to Japanese investors were to suddealy outweigh the income from holding the U.S. securities, the Jap-In the meantime, other candi- anese could be forced to dump the dates are under consideration for securities, a move that could create

Tianjin Mayor Said to Be Deng Favorite for Prime Minister

By Daniel Southerland

Washington Past Service
BELITNG --- Although ideology dominates the headlines in China's spapers, party officials are engaged in a struggle for power and influence that counts as much as the ideological arguments, diplomats and other analysts said

According to two Chinese analysts who have separate connec-tions to high levels of the government, Deng Xiaoping, China's senior leader, decided several months ago that the former Communist Party chief, Hu Yaobang, who was forced to resign Jan. 16, was accumulating power and influ-

ence at too rapid a rate. They said that Mr. Hu had placed many of his proteges in po-sitions of influence without con-

sulting other leaders. Mr. Hu, it is said, also neglected to give a place in his plans to cer- take all interests into account, one tain powerful interest groups, in- analyst said. The key question is:

Mr. Hu favored political changes which, in the view of party conservatives, would have decreased the Diplomats said that Mr. Deng's power of the Communist Party and its influence in both the government and industry. He fostered a more open political debate, allowing academics to propose ideas that challenged party control over much of society and the economy.

Some sources say that the conservatives, in particular, apparently complained to Mr. Deng about Mr. Hu's moves and that pressure from the conservatives probably proved critical in turning Mr. Deng against

Mr. Deng apparently prefers to have a balance of power at the top. Then, from a position somewhere in the middle of a spectrum of views, he acts as supreme arbiter.

Information for the Shareholders of Nixdorf Computer AG

Nixdorf Creates Capital For The Future

Capital Growth Resources

Nixdorf attained its growth target in 1986 by lifting revenue 15 per cent to DM 4.51 billion. But for adverse currency movements affecting the conversion of foreign sales into D-Marks, revenue would have increased by 21 per cent. So for yet another year, Nixdorf again outpaced the industry

Our objective in 1987 is to stay firmly on the growth path. With orders on hand totalling more than DM 4.43 billion, we're off to a very good start. As the year began, orders on hand were up by 13 per cent on the level a year ago. This figure was also affected by adverse currency movements. In preparation for ongoing expansion, we again kept

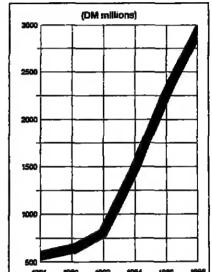

capital expenditure high in 1986: Besides recruiting and training an additional 2,300 personnel, we invested DM 600 million in fixed assets, and DM 420 million in research and development.

Capital Financial Resources

Pursuing growth on a firm financial base has always been a Nixdorf principle: Our equity ratio of more than 60 per cent says everything. Our financial resources allow us to continue business expansion while retaining our independence.

That's one advantage. Another is for you the customer to ponder: after all, this exceptional financial base is also an assurance that Nixdorf is a dependable, long-term partner who will stay with you into the future. We nurture this partnership by sustained and substantial capital investment in fixed assets, research and development, and ongoing training of our people.

We intend to seize every l opportunity for expansion in

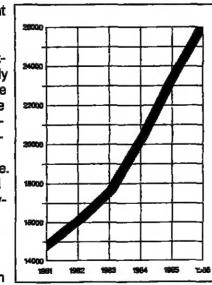

our established markets, while opening up additional revenue sources in new growth markets: With innovative applications like CAD/ CAM solutions and telecom products.

Capital Competitive Resources

People are our most important asset. Our competitiveness depends essentially on their skill and commitment. This explains why we invest so heavily in personnel training. We have to: 7 out of 10 of our workforce of 25,600 people are employed on customer support activities, where their qualifications make all the difference. We're also deeply committed to vocational training for newcomers to the industry: in 1986, the number of Nixdorf trainees rose by 23 per cent to 1,800. This year, we plan to take on

another 2,000 personnel, chiefly to consolidate Nixdorf's Another of our competitive traditional strengths in customer service and software development. If there's one single attribute that gives us the edge over the competition, it's our dedication to meeting customer requirements. It's this that guarantees Nixdorf users a lasting and successful partnership.

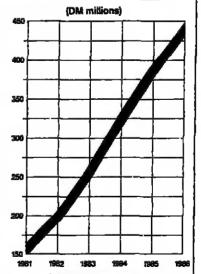

strengths is our in-depth knowledge of vertical industries. As a 'general contractor' for information technology solutions, this industry expertise gives us the ability to understand every customer's business and offer each a system suited to their needs. Our aim is to become Europe's Number One system supplier providing users with total solutions, complete with hardware, software and comprehensive services.

Capital Innovative Resources

Converting new technologies into innovative solutions is a Nixdorf tradition. And this is based on a long-standing company commitment: to provide the end-user with all the benefits of computer power.

Nixdorf takes "raw material" chips, for example, and customises them creatively to provide end-users with information technology in the form of future-oriented systems. These systems extend the power of the computer to include word processing, graphics and voice communications; they encompass multifunctional terminals and database applications for integrated information processing in the office or factory.

With its innovative resources, Nixdorf is furthering the convergence of computer and communications technology, and accelerating

R&D Expenditure

the emergence of new and better telecom services: With products like ISDN-capable PABXs, digital telephone systems, videotex terminals and broadband switching systems for the German PTT.

Our R&D expenditure in 1986 amounted to more than 9 per cent of revenue.

Southern Units Quit The Contra Alliance

By Richard Boudreaux and Doyle McManus

Los Angeles Times Service
SAN JOSE, Costa Rica — Commanders of Nicaraguan rebel groups operating in southern Nicaragua have announced their withdrawal from the United Nicaraguan Opposition, the U.S.sponsored alliance of rebel groups, citing dissatisfaction with the way the coalition has been run.

Also on Tuesday, sources close to Arturo José Cruz, one of the organization's three directors, said he had decided to resign from the alliance because he believed that

Accused Spy Released by Nicaragua

MANAGUA — Sam Hall, a self-styled American soldier of fortune accused of spying in Nicara-gua, was freed from custody Wednesday and allowed to leave the country for the United States. Nicaraguan officials said Mr. Hall, the brother of U.S. Representative Tony P. Hall, Democrat of Ohio, was released because he is

mentally unstable. Mr. Hall, who was arrested Dec. 12, was brought to Sandino International Airport in Managna and turned over to the U.S. vice consul, Luis Moreno. The two men em-braced and Mr. Hall boarded a plane accompanied by Gary Froelich of Dayton, Ohio, a family lawyer who arrived in Managua on

"I just have one thing to say to the Nicaraguan people," Mr. Hall, 49, said before boarding the flight. "I'm sorry I tried to ambush them."

Mr. Hall said he was well treated during his detention, adding: "Prison authorities were terrific. They treated me like a human being."

He was arrested in a restricted area of the Punta Huete air base, 13 miles (21 kilometers) northeast of

The authorities said they found maps and sketches of military targets stuffed in Mr. Hall's socks, and threatened to try him for espio-

Javier Chamorro Mora, deputy foreign minister, said Tuesday that Mr. Hall was being released "so he may be taken to the United States and receive adequate treatment at a

specialized institution. He said a psychiatrist and a clini cal psychologist had found Mr. Hall to be "a very unstable personality who might "carry out acts

that could end his own life." As a result, he said, Mr. Hall had been "declared exempt from re-sponsibility" for acts that "clearly violated" Nicaraguan law.

Illegal Vietnamese Exits

Outnumber Legal Ones

Agence France-Presse HANOI - For the first time since 1983, more Vietnamese left the country last year as "boat peo-ple" than under the United Na-bons's orderly departure program, UN statistics issued here show. Unauthorized departures by boat fell

Orderly departures under the UN program fell more sharply, however, from 24,940 people in 1985 to 18,418 last year. The orderly departure program has slowed nce the beginning of 1986 because fail to meet the entry requirements

the group was unfairly dominated by the largest and most conserva-Democratic Force.

A second leader of the rebel alli-ance, Alfonso Robelo Callejas, also complained publicly Tuesday about the Nicaraguan Democratic Force. He charged that it was attempting to take control of the en-tire rebel movement.

"An alliance requires a mini-mum of cooperation," Mr. Robelo said. He said that since rebel commanders operating in southern Nicaragna have seen no cooperation, they see no sense in staying in

Other officials said that his comments referred to the small amount of U.S. aid that had been allotted to

The withdrawal of the rebels operating in southern Nicaragua, known as the Southern Front, from the alliance is a severe blow to the rebels' prospects, according to re-bel officials. The officials said it means that those units, with as many as 2,300 troops, will no long-er coordinate military strategy with the larger Nicaraguan Democratic Force, which fights mostly in northern and central Nicaragna.

Along with Mr. Cruz's reported plans to resign, it also means that the rebels, who are known as contras, no longer can claim to speak with a unified political voice. This was one of the Reagan administration's aims when it pressured the rebels to set up the United Nicara-

guan Opposition in 1985. The seven commanders of the Southern Front announced their decision in a communiqué signed Saturday in southern Nicarago and distributed Tuesday in San José. It said they would keep fighting Nicaragua's leftist government in an independent way.

The commanders said they had been promised "immediate and massive military aid" from the United States when their army was formed in May 1986 and joined the rebel alliance, but that "the promises were not fulfilled."

"We have become the victims of deception and an attempt to destroy the southern forces," they

The rancor between Mr. Cruz. and Mr. Calero has been growing for two years, and Mr. Cruz has threatened to resign from the alliance at least twice before. But several close associates said that Mr. Cruz appeared genuinely set on leaving this time.

Mr. Cruz, a moderate who served in the Sandmist government immediately after the 1979 revolution in Nicarashia, is highly respected in the U.S. Congress and elsewhere

outside Nicaragua. The third leader of the rebel alliance, Adolfo Calero Portocarrero, the head of the Nicaraguan Democratic Force, refused to respond directly to his colleagues' complaints. We are part of a democratic alliance," he said through a spokesman, "and we discuss issues within

that alliance." In Washington, a State Department official said that the Reasan administration was concerned and

was working to heal the rifts.

The official said that the complaints of the Southern Front commanders about the lack of U.S. aid "can and will be rectified shortly."

The issue is important in the U.S. by around 3,000 people to 19,575 in Congress, where an administration request for \$105 million in military aid for the rebels is to be debated

Both Democrats and Republicans in Congress have urged the contras to broaden their political appeal. The conservative Nicaraguan Democratic Force has largely of a backlog of tens of thousands of dominated the contras' political Vietnamese who hold exit visas but and military efforts. Its leadership includes several former supporters of the major host countries, the of Anastasio Somoza, the Nicaraguan dictator who was overthrown

Reaction to Reagan: Sharply Partisan

Democrat Feels 'Lack of Respect,' but Republicans Cheer

By Linda Greenhouse New York Times Service

WASHINGTON - President Ronald Reagan's State of the Union address has provoked a congressional response that was more sharply partisan than veteran members of either party can re-

"It was the most polarized Congress I've watched listening to a presidential speech in 27 years in Congress, said Senator Robert T. Stafford, Republican of Vermont, as he emerged Tuesday night from the chamber of the House of Representatives.

At numerous times in the speech, Republican senators and representatives were on their feet cheering while the Democrats sat, motion-

"As far as Congress goes, the days of rhetoric have passed, and that's why you saw that reaction," Senator Edward M. Kennedy of Massachusetts said in explaining the silence of his fellow Democrats.

Representative Tony Coelho of California, the House Democratic whip, said he was struck by the "lack of respect in the chamber." He added: "The Republicans were trying to do rah-rah, and as a result the decorum deteriorated."

The Republicans overreacted, Mr. Coelho said, and this "made Democratic nonreaction big-

crats sat silently when the president took "full responsibility" for the Iran arms affair and when he tirged continued support for the Nicaraguan rebels, known as contras.

Radar Stirs

Copenhagen By Michael R. Gordon

WASHINGTON - A dispute among U.S. arms-control experts over a new early warning radar in Greenland, which is Danish territory, has spilled over into Denmark. The United States has been helping the Danish government counter allegations that construction of the

radar violates the 1972 Anti-Ballistic Missile Treaty. The radar is supposed to replace an older installation at Thule, Greenland. The United States also

New York Times Service

plans to replace a radar on the Yorkthire coast of England. Some arms-control specialists contend that the ABM treaty does not allow the deployment of new early warning radars of this type outside of the United States and

the Soviet Union. The Americans contend that the United States is not deploying new radars, but modernizing old ones. These arguments have also been presented in the Danish press.

Raymond L. Garthoff, one of the U.S. negotiators of the 1972 treaty, has been quoted by Danish news organizations as raising ques-tions about the legality of the new radars. Mr. Garthoff said he had told the Danes that Article 6 of the treaty limited new radars to the

periphery of the national territory. The Danish press has also referred to a U.S. position paper of 1971 saying that the United States would not be able to replace its existing radars in Greenland and Britain with new large phased array radars, which use advanced computers and electronics to track mis-

The United States contends that the paper has no legal significance ise it was never comm ed to the Soviet Union.

Last week, the Danish press took ote of a statement by the U.S. Air Force that also raised legal ques-tions about the Greenland radar, The statement, submitted in 1980 to the Senate Armed Services Committee, said the air force had initially rejected the idea of building the Greenland radar, partly because of "potential ABM treaty conflicts."

The air force later changed its mind, and its early statement had been generally overlooked until re-

In Denmark, the Socialist People's Party and the Left Socialist Party have been pushing the radar issue, calling for an independent commission to look into it. The larger Social Democratic Party, an opposition party that makes up about a third of the parliament, has been more cautious.

■ U.S. Assurance Cited Foreign Minister Uffe Elle-

mann-Jensen said Tuesday that the United States had assured Denmark that modification of the radar was not in violation of the ABM treaty, The Associated Press reported from Copenhagen.

"The U.S. government has assured Denmark of its intention to uphold the ABM treaty," Mr. Ellemann-Jenson said in a statement issued after a closed meeting of the parliamentary foreign affairs pan-

"In particular, the Americans have declared that they neither could not would test the Thule radar in an ABM context," the minis-

Speaking on television after Tuesday's meeting, a Left Socialist member of parliament, Pelle Voight, said he was not satisfied with the minister's report, and he called on the government to publish what he called "the facts" about Thule.

U.S. Dispute Record Cold, Snow Bring Over Thule Washington to Standstill

WASHINGTON - Record cold numbed the U.S. capital Wednes-day, and government workers were given the option of staying home in the aftermath of back-to-back win-

The temperature dropped to minus 25 degrees centigrade (minus 13 degrees Fahrenheit), a record, at Washington's Dulles International Airport in northern Virginia, the National Weather Service said.

A winter storm ranked as the worst to hit the Northeast in four, years dumped eight inches (20 cen-timeters) of snow on Washington on Jan. 22, closing area schools and ernment offices through Friday. A second storm that du 12 more inches on the city Sunday and Monday kept students and workers home through the first three work days of this week.

The transit authority for the sixth day in a row reported extensive delays throughout its electri-fied rail network, and miles of above-ground track were out of service because of low temp equipment failure and the lack of de-king system.

New Inquiry Planned for Palme Case

STOCKHOLM — The Swedish government, faced with a growing dispute between the police and prosecutors seeking the killer of Prime Minister Olof Palme, yielded Wednesday to opposition pressure and announced a parliamentary inquiry into the case.

"We have agreed that a parliamentary inquiry should look into the circumstances of the investigation," Mr. Paime's successor, Ingvar Carisson, said after meeting with the leaders of the opposition

Earlier this week, all three leaders in the center-right opposition coalition called on Mr. Carlsson to set up a political inquiry after an argument broke out between Stockholm's police chief, Hans Holmer, and prosecutors assigned

Mr. Carisson declined to comment on radio reports that a plan had been discussed by the party leaders to remove Mr. Holmer and the chief prosecutor. Claes Zeime, from the inquiry. Mr. Zeime is on leave because of illness.

Political sources said the new inquiry was a final attempt by Mr. Carlsson to stop the feuding.

They said the inquiry would be Kurdish community and detained aimed at trying to restore the image 20 persons suspected of having of the country's police force, which has suffered badly from the public quarreling and the failure to find

Lagos Tells Embassies to Move by '89

LAGOS - Nigeria has surprised

diplomats in Lagos by asking them to move their embassies by 1989 to Abuja, the planned new capital, which is still in an early stage of construction, diplomats said.

In a brief note sent to embassies last week, the Foreign Ministry said the federal government would be moved to Abuja by 1989 and expected the foreign missions to be there by the same date. Abuja is about \$600 miles (200 billionstern) last week, the Foreign Ministry said the federal government would be moved to Abuja by 1989 and expected the foreign missions to be there by the same date. Abuja is about 500 miles (800 kilometers) northeast of Lagos.

The announcement appeared to ment have caused constant delays. Lagos is close to the heartland of the Yoruba people, one of Nigeria's three dominant ethnic groups. Advocates of the project have contended that Abuja, which was historically inhabited by a tiny minority group, would be free of any tribal association. about 500 miles (800 kilometers)

take the large diplomatic commu-nity in Lagos by surprise, as the

deadline was far shorter than their The multibillion-dollar Abuja project was begun in 1976 but the

sharp decline in Nigeria's oil in-come and four changes of govern-ment have caused constant delays.

DOONESBURY

An Economic Tinderbox

Leaders in Western Europe and Japan have a good idea of what must be done to right the yawning imbalances in world trade and money flows. Thanks to unsubtle signals from U.S. Treasury Secretary James Baker, they are also beginning to under-stand the dangerous consequences of continuing inaction. But this does not mean that the group of five, meeting early next month, can achieve an agreement with teeth. For in each country teeth would bite into powerful economic interests. That is something that none yet dare do.

Japan and Europe sell America about \$100 billion more in goods and services each year than they buy. They have kept the process going by lending the difference — in part because individuals and corporations see no better place to invest their savings, in part because their governments are eager for American markets.

Americans get computer chips and cham-pagne in return for handsomely engraved certificates. If Japan and Europe are foolish enough to consider it a fair trade, why is Mr. Baker trying to change their minds?

Several reasons. Those certificates -Treasury bills, stocks, mortgages - are claims on wealth that must some day be repaid, or be depreciated away in a general inflation that would hurt Americans as much as foreign owners of dollars. A second worry is that Congress will head the pleas of American businesses and erect far tougher barriers to imports. Weak industries would be protected, reducing Ameri-

can productivity and living standards.

The immediate threat is that foreigners will cool to new dollar investments and rush to other currencies. No one knows what would happen in a crisis, with holders of trillions of dollars heading for the exits. But almost everyone would expect a world recession cansing great, lasting damage.

That is why many analysts cheered when
Mr. Baker talked down the dollar by a few

points. He demonstrated the vulnerability of Japanese and European export interests and the risks of holding hundreds of bil-lions in dollar-denominated assets. But analysts and leaders alike realize that to avoid a real crisis, Japan and Europe must absorb more of their own productive capacity by stimulating internal demand. For its part, America must reduce its thirst for foreign capital by reducing the budget deficit.
This is, more or less, what leaders of the

big five have already agreed to do. But no one is in a hurry to be first with tangible policy changes. Cutting the U.S. budget deficit is obviously difficult, particularly with a president hostile to tax increases. And while spending more at home may not seem as difficult as belt-tightening, weak governments in Japan, West Germany, France and Britain have no taste for taking on their exporters' lobbies. The world economy crackles, dry and dangerous, as Washington, Tokyo and Bonn fiddle.

- THE NEW YORK TIMES.

A Democrat in Manila

On the left, zealots thirst for martyrs and shootings, the stuff of revolution. So what does the president of the Philippines do? She opens her palace to fist-shaking demonstrators and orders her cabinet ministers to greet them in an arms-linked human chain of bureaucrats, businessmen, students and nuns. One can hear revolutionaries furning at this stratagem, so obviously calculated to win votes in next Monday's plebiscite on the constitution framed by Cory Aquino's year-old government. One can hear the right-wing reactionaries as well, bemoaning

their adversaries' failure to produce chaos. Last Thursday the police fired into a crowd of 10,000 demonstrators, killing 18 and wounding scores. That was the usual way of dealing with protesters during the Ferdinand Marcos era. Indeed, the shootings occurred at the scene of bloody antigovernment riots in 1983. But Mrs. Aquino refused to play by the old rules. She admit-

ted error and ordered an inquiry.

To those on the right, holding the military accountable for such offenses is akin to treason. In the Marcos era soldiers were above the law, even when Benigno Aquino returned to Manila's airport in 1983 to his death. Doubtless nostalgia for those good old days ignited this week's attempted coup, in which anti-Aquino troops screaming "Marcos Forever!" seized a television station and tried to capture an airfield. The mutiny was quickly contained by the supposedly (eeble Aquino regime.

There may be pleaty to criticize about Mrs. Aquino. Perhaps she is mistaken in believing she can negotiate peace with Communist guerrillas; yet she is right to try, carefully. Perhaps she is wrong not to have honored pledges of land reform; maybe this will come after next week's vote.

But her achievements cry out for applause. The Philippine Republic is now the liveliest democracy in Asia; more remarkably, the armed forces are committed to upholding that freedom. For this she shares credit with General Fidel Ramos, the chief of staff, and a superlative defense minister, the retired General Rafael Ileto.

A decisive victory for the new constitution would give momentum to the democratic cause and confirm Mrs. Aquino's title as president until her term expires in 1992. Hence the frantic attempt by far left and right alike to discredit her by blaming her regime for the disorder that each is trying to provoke. Their schemes might succeed if only Mrs. Aquino played by the rules. Her refusal to do so marks her as a real revolutionary, a genuine original and a democrat.

- THE NEW YORK TIMES.

President Aquino seems to have survived a second coup attempt, but the sequence cannot fail to hurt her at a time when her authority was taking a battering and she needed every ounce of political strength at her command. The coup was evidently launched by soldiers of the same military clique that acted in July; it has links to the exiled former president, Ferdinand Marcos. and to the ousted former defense minister, Juan Pooce Enrile. Again Chief of Staff Fidel Ramos saved her. Again the fragility of Philippine democracy was underlined.

In recent days two other hard blows have fallen on Mrs. Aquino. Somehow -- by accident? by leftist provocation? by rightist conspiracy? — government troops fired into advancing demonstrators, killing a dozen or more and raising precisely the specter of army vs. people that had dark-ened the rule of Mr. Marcos. Then political rivals released tapes of wiretapped telephone conversations in which Mrs. Aquino, speaking with aides, seemed to be breaking a piedge not to tamper with the supposedly independent constitution-writing commis-sion, as if she was acting to curry U.S. favor The demonstrators who were fired upon

were demanding that land reform begin with distribution of lands owned by Mrs. Aquino's family. The main body of Philippine insurgents recently entered a brief cease-fire, and the shooting gave them cause to ask who controls the armed forces. The cease-fire is due to expire on Feb. 8. Already on Feb. 2, however, a plebiscite is to be held on the new constitution. Dealing with the insurgency and putting democracy on a firm legal basis are vital national interests for which Mrs. Aquino needed every political resource available to her.

Americans have tended to see Philippine politics as a morality play: light in conflict with darkness. A truer view might be that Mrs. Aquino represents a set of interests democratic, propertied - in contention with anti-democratic elements in one part of society and revolutionary elements in another. She did not come to office until the situation had deteriorated dramatically, There can be no premature rejoicing for the democratic cause in the Philippines. The United States has to stay alert to the limited but important ways in which it can assist Mrs. Aquino and the other democratic

forces in the task of national renewal. - THE WASHINGTON POST.

More of Kohl's Same?

The message of Sunday's West German elections seems to be more of the same. Chancellor Helmut Kohl is back, if slightly chastened, for what promises to be another round of friendly oratory followed by cautious and even timid action. In other words, Bonn is unlikely to help much in making tough decisions about the international economy or East-West relations.

The tea leaves are interesting to read nonetheless, Mr. Kohl's Christian Democrats got their lowest vote since 1949. Yet he still heads a coalition with a solid 53 percent of the vote. Within the coalition, Franz Josef Strauss, the Bavarian, made probably his final bid to move to Bonn, share leadership and press foreign policy rightward. He lost, soundly. And Foreign Minister Hans-Dietrich Genscher's Free Democrats benefited from Mr. Strauss's harsh attacks; again defying predictions of their demise, they made solid gains. So did the Greens, the maverick environmentalists who say they are neither left nor right but ahead.

They seem to have put protest firmly into the West German political mainstream. Mr. Kohl's campaign pledge of "More of the Same, Germany" is likely to be borne out. All too possibly, it means not much of anything. West Germany is Europe's eco-nomic power, yet Mr. Kohl has played little of the leadership role that this implies. He has resisted pressure to push economic reform in the European Community, as well as pressure from the United States to stimulate the West German economy, He calls for better relations with Moscow and for arms control but does not push Washington to make the necessary accommodations on issues such as space-based defenses.

Voters sent the right message when they shunned Mr. Strauss and his "patriotic" emotionalism. They chose moderation, as support for the Free Democrats showed Mr. Kohl's re-election gives him another chance to show that moderation need not be synonymous with complacency.

Beirut at Your Own Risk, Not Your Government's

By Larry Pintak

ROME — West Germany arrests
a suspected hijacker of TWA
flight 847, and West German citizents
are kidnapped in Beirut. The United States can no
States requests extradition of the susare kidnapped in Beirut. The United States requests extradition of the sus-pect, and Americans in Beirut disappear. France sells weapons to Iraq. and French citizens are kidnapped in Beirut. The United States bombs Libya with planes flying from British bases, and British citizens are kid-

papped and murdered in Beirut.
Recent events have proved that some Middle Eastern countries could easily do without their expensive embassies in the West. A single kidnapping ring in West Beirut is apparently much more effective than a hundred diplomats. Any time the terrorists want to blackmail a Western government, they simply grab one of that country's cirizens in West Beirut. This flow of human ammunition

nouse go turner.
The president should announce that any American who goes to West Beirut is on his own — that the UnitComin

ed States government will not negotiate for his return.

No more diplomatic mumbo pure bo about travel advisories. No more be about travel advisories. No more meaningless warnings that you go "at your own risk." Just plain, simple language: If you are abducted in West Beirut, you will have to get yourself out. Kidnappers who grab Americans should be prepared to feed them for a long time. The United. States will do nothing.

Margaret Thatcher, Helmut Kohl.

François Mitterrand and Betting-Craxi should all give the same tree-

sage to their citizens.
While Terry Waite, the tireless Anglican envoy turned hostage negotia-tor, has been trying to win freedom for hostages, at least nine more for-eigners have been Lidnapped. Some people from nine countries are being held against their will. At this rate Mr. Waite will have a job for life

he, too, has not been kidnapped.
There have always been valid ret sons for visiting the Maslem sector of the Lebanese capital despite the risks: diplomacy, relief work, jour-

nalism, business. None of them are valid any longer. It is not possible to conduct a coherent Middle East policy as long as individuals keep jam-ming up the gears of diplomacy. Hostages are a powerful weapon against the West. Terrorists and their patrons. will undoubtedly reload that weapon. as often as they get the chance. In the months before the kidnep-

ping of Terry Anderson, an Associated Press correspondent, those of us who made up the last group of American reporters based in Beirnt spent a lot of time anguishing over whether we were targets for the kidnappers. We tried to reason away the danger. The terrorists needed us around to publicize their outrages, we told ourselves: they'll leave us alone. But the

didn't. Terry is living proof of that. Other Americans were also ratio-No direct evidence has surfaced to nalizing their decision to stay. Professors at the American University told themselves that the Lebanese wanted them there to educate their youth. The men who dragged Thomas Sutherland away obviously did not subscribe to that argument. Relief workers believed that their efforts on behalf of the needy and homeless showed that they cared. Father Lawrence Jenco found out how fittle that counted. We were all wrong.

"But what about the poor Lebsnese and Palestinians?" some people will shout. "We won't be able to give them aid, tell their story, sell them ball bearings." This is a patronizing argument that ignores the abilities of the scores of Arab and neutral Third World professionals who already car-ry out their duties with apiomb.

If the ego or greed of any Western-er is such that he feels that he alone can do the job, so be it. But his country's foreign policy should not have to suffer as a result. What about our rights?" others

will ask. "We should be able to travel where we want" Agreed. No one is saying it is illegal to go to Lebenon. It is just stupid.

The government has a duty to

protect its citizens," a few will insist. in normal times and places, yes. But Beirut in 1987 is far from normal. The U.S. government also has a duty to the rest of the nation.

Get the current hostages out. Mr. Anderson and Mr. Sutherland, in particular, have been languishing in damp basements for some 20 months, since before the dangers were so clear. After they are out, pick up and go. Refuse to play the hostage game anymore. The terrorists won't stop. They will still find ways of inflicting their particular brand of violent diplomacy in Europe or inside the United States. The difference is that it won't be quite so easy for them.

The writer, a former CBS News correspondent in Beirut, recently completed a book on U.S. involvement in Lebanon. He contributed this comment to The New York Times.

Rails Can Lead Out of Southern African Deadlock

LUANDA, Angola — The black countries of southern Africa are stepping up efforts to reduce economic dependence on South Africa, which uses it to assert "regional superpower."

Most of the newly independent countries are hurting badly through a particularly unfavorable combination of circumstances: their own policy mistakes, a long drought, the price collapse of major export earners like oil and copper and, in the cases of Mozambique and Angola, the cost and disruption of guerrilla wars.

South Africa compounds their troubles to gain leverage against support for its black resistance. The key to escaping the worst of the pressure has been identified as two railways, one ending in Mozambique's Indian Ocean port of Beira, the

other in Angola's Atlantic port of Benguela. They not only carry exports and supplies for landlocked countries, they were important money-earners. With both blocked or severely limited, the countries involved are obliged to rely on South African transit or vastly more expensive routes. So reopening the Benguela line and the Beira corridor to Zimbabwe has become a top regional priority. This has political undertones. Angola, Zaire,

Zambia and Mozambique have arranged a meeting of transport ministers to push the Benguela project. Zaire has ports, but Benguela is the best way to the sea for its mining products, so it is showing interest despite tensions between its pro-Western policy and Angola's ties to Moscow and Havana. There are rumors in Luanda that President Mobutu Sese Seko of Zaire has been asked to promote

a U.S.-brokered cease-fire agreement, around the

By Flora Lewis

railway, between Angola and the South African-supported UNITA rebel movement of Jonas Sa-vimbi. Angolan officials deny any interest in a deal with Mr. Savimbi and express confidence that they will be able to secure the line militarily.

But they do say that the other countries which would benefit ought to help. They talk of preventing infiltration by UNITA from neighboring territory and of using diplomatic influence on the United States and the Commonwealth.

One sign of how truthy the policy is common to the countries of the

One sign of how touchy the subject is comes in the suggestion from the Angolan interior minister. Manuel Alexandre Rodrigues, that to the extent that U.S. arms for UNITA are going through Zaire, as reported, they must be smuggled without the permission of President Mobutu. In the circumstances, that is the utmost in tack

The Angolan regime is opaque, Cuban-style, but there are signs of disagreement between hard-liners and those who would like to probe for some way out of the stalemate. Comments on Fidel Castro's statement that Cuban troops (now some 30,000) would stay in Angola until South Africa "is

liberated" provide a glimpse. Mr. Castro stopped off in Luanda, uninvited, on his way home from September's nonaligned summit in Zimbabwe. His speech appeared to contradict the Angolan position that the Cubans would be sent home when the South Africans pull out of Namibia and give it promised independence. Mr. Rodrigues, better known by his guerrilla name of

Kito, said "our priority has not changed." He spoke politely of Cuban help but said firmly that Angola's policy was made in Angola.

He is a Politburo member, 43, with considerable international experience. He led Angola's delegation to the U.S.-sponsored talks that produced the Lusaka agreement with South Africa on monitoring incursions across the Namibian border.

Other officials, not quite as senior, said flatly that there was no contradiction between Mr. Castro's words and Angola's focus on Namibia be-cause the heart of the issue, in any case, is South Africa's regime. This would be a slide toward broadening the conflict and removing what slim chance may remain for a Namibian settlement, promised year after year.

South Africa is not interested in a settlement. Mr. Castro appears in no futerested in a settlement.
Mr. Castro appears in no hurry to bring his troops home, where unemployment is high. Western diplomats in Luanda think that Moscow has encouraged Angola to seek Western capital, but Soviet interests are served by prolonged hostilities. Angola has had to pay for its arms. But the military stalement and common in account density are stalemate and accompanying economic decay are a terrible burden on Angola and its neighbors.

There does seem to be a fork in the road at this point, one way leading to a chance for regional recovery, the departure of Cuban troops and a more truly nonaligned Angola, the other to perpet-uation of strains until South Africa explodes and the conflagration engulfs all involved. The rail-ways are a lifeline out of deadlock, a chance for diplomacy to overtake decision by arms.

In Seoul, a Marcos-Style Syndrome of Inside Deals

WASHINGTON - Will South Korea's President Chun Doo Hwan go the way of Ferdinand Marnes? The cases di cos of the Philippi fer in many ways, but one crucial similarity helps explain why Mr. Chun faces increasingly widespread opposition. Comption in the Korean military regime has now reached proportions that could soon rival

those of the Marcos negod Relatives of Mr. Chun's wife, Lee Soon Ja, have been tarnished by a major financial scandal, and political foes have charged that his younger brother, Chun Kyung Hwan, has links to organized crime ligures.

On a recent visit to Seoul, I asked many people why a poli taken by a leading newspaper showed 86 per-cent of the people to be either opposed or strongly opposed to the present government and only 1.6 percent to be satisfied. Nearly everyone talked about the blatant corruption

of "this dirty regime."

Corruption has been magnified by the economic boom. South Korea's annual 7 percent growth rate is in striking contrast to the near collapse of the Philippine economy during the last days of Mr. Marcos, But one key to such rapid growth is a tightly contralized economic system that has invited abuse of power by insiders. Emulating Japan, successive KoreBy Selig S. Harrison

grated network of government-supported conglomerates and affiliated banks designed to give Seoul a coordinated thrust in world markets. But unlike the Japanese businessdemocratic controls, this close-knit Korean economic structure emerges from a police state and is inherently vulnerable to manipulation.

Leading banks and corporations were easily induced to cooperate

The case came to light after arguments developed over the division of the \$407 million in profits. It was

This is the first of two articles.

government partnership, with its two banks later resigned. Mr. Lee's

when a finance company set up by relatives of Mr. Chun's wife concocted an audacious scheme for profiteer-Borrowing \$115 million from two

leading banks, the finance company made long-term loans totaling this amount to six financially pressed corporations, according to South Kore-an press reports. The corporations then signed promissory notes worth \$522 million. These notes were resold at this price with bank guarantees.

initially exposed by the underground press. The case eventually went to the courts but received only sketchy coverage in the controlled media.

Although Mr. Chun's wife was not implicated, her uncle, Brigadeer General Lee Kyu Gwang, and his sisterin-law, Chang Yong Ja. were convicted in 1982 on charges including fraud and bribery. The presidents of the parole from prison has made the case a cause celebre. According to the underground press. Chang Yong Ja is in a special, plushly furnished cell.

Since opposition statements get little attention in the daily press and on television, many South Koreans rely as much on the underground press as on the controlled media. This polarized journalistic climate makes it difficult to pin down information concerning an alleged role of Mr. Chun's family in certain corruption cases.

An 83-page underground report on politics and corruption alleges that Mr. Chun's father-in-law, Lee Kyu Tong, was involved in a land scandal in which a consortium of 20 companies obtained re-zoning permits that allowed the development of resorts and golf courses in the virgin Sulak and Chiri mountain areas. The underground press affered that the Myungsung group, armed with advance knowledge of the permits, bought up nearly a million acres

prices. The consortium reportedly grossed \$54 million in 1982 before 22 violations of tax laws, construction codes and forestry regulations.

substantiate charges that the father-in-law or any other relatives were involved. Roh Tae Woo, the parliamentary leader of the ruling Demo-cratic Justice Party, dismissed the corruption allegations as "greatly exaggerated." He said that there was no evidence linking the president's family with the Myungsung scandal. But there is a widespread pub-

lic conviction that someone in Mr. Chun's inner circle must have fixed the re-zoning permits and shared in the profits. Similarly, despite a lack of evidence, Mr. Chun himself was suspected after underground press reports about several companies changing ownership. These enterprises reportedly were sold or went out of business after government prosecution for tax evasion or other offenses, only to turn up later under new names in the hands of someone close to the president. Mr. Roh denied that the president's family was involved in these changes.

When Mr. Chun came to power. according to a knowledgeable source, his brother, Chun Kyung Hwan, rapidly emerged as the man to see in Secoul for favorable treatment on tax matters, government construction contracts and import licenses. He was named as director of the government's rural public works program, Saemaul, which has a \$118 million annual budget. Saemaul's failure to present a detailed budget to the National Assembly has led some legislators to question whether "Little Chun has misappropriated funds.

On several occasions, most of them unreported, opposition members of the National Assembly say they have tried unsuccessfully to get "Little Chum" to testify. Once it was an-nounced that he had suffered a heart attack, although a U.S. Embassy offi-cial who called to extend his sympa-thies found him on the golf course.

The writer is a senior associate of the Carnegie Endowment for International Peace. He contributed this comment to The Washington Post

IN OUR PAGES, 75 AND 50 YEARS AGO

1912: Danger in China PARIS - [A reader writes:] "A long familiarity with the Chinese, officials and people, and a residence in China of many years justify me in asserting that of all countries China is about the least litted for experimentation with the republican form of govern-

ment. The situation now is bad; under a republic it will be a case of confusion worse confounded. The overthrow of the dynasty and the success of the Sun-Yat-Sen clique means a period of anarchy. Then China will fall under the iron rule of some dictator or will be "pacified" by the European Powers and Japan i.e., dividing it up among them. The present crisis is but the prologue of a present criss is but the protogue of a grim tragedy. You are perfectly right in urging the Powers to support the Throne and strengthen the hands of the traditionalists against the revolutionists. What is needed in China is

evolution, not revolution.

1937: Trial in Moscow MOSCOW - Andrei Vishinsky, the

chief prosecutor of the Soviet Union. demanded the death sentence for the 17 defendants in the Russian treason trial [on Jan. 28]. He summed up the evidence against the accused, includ-ing Carl Radek, journalist; Gregory Sokolnikov, former Russian ambassador in London, and 15 others who allegedly conspired to dismember the Soviet Union. "The law demands," Vishinsky said, "in the event of guilt being proved, shooting, which can be commuted only in the event of extenuating circumstances. I believed there are none. Not I alone accuse you of these crimes. There are the people mined, killed and mained by you, who stand before me now. The dead stand here, too, pointing at you with their terrible hands and demanding with me and my country, only one punishment — death by shooting." There were loud cheers.

Ambassadors Don't Have to Be Rich

WASHINGTON — William F. Buckley Jr. contributes poorly to an understanding of the role of ambassadors and the conduct of U.S. foreign policy. ("The Ambassa-dor's Entertainment Fund," Jan. 24.) He in effect tries to perpetuate twin myths: that ambassadors should primarily be expected to "sell the president's program" abroad; and that "rich" ambassadors are needed because government funds are insufficient to cover essential representational expenses: Both points, while widely accepted, are wrong. All U.S. government employees must be loyal to their president and

follow that ambassadors should be mere cheerleaders. They have a higher loyalty. They should analyze for the president, and report through the secretary of state, all essential political, economic and social conditions affecting policy issues related to their assignments. To do this they must understand the country to which they are assigned and be able to give the U.S. government their unvarnished view of the pros and cons of actual and prospective U.S. policies. They must be able to analyze

support his policies, but it does not

It is not an easy task. In addition to knowing the language, culture, economy and politics of the partieular country (or, in international institutions, those of the key countries), ambassadors must be serious students of U.S. national interests and of foreign affairs generally. And they must report their analysis of events and prospects fully and frankly, regardless of the possible reactions of the administration. The last thing the U.S. government

the effects of various policies on short- and long-term U.S. interests.

By John W. Tathill

needs is sycophants abroad who tailor their reports and actions to please superiors at home. Mr. Buckley writes admiringly of

"the pizzazz associated with the policies of a president who feels an afflatus to bring about important change." "Afflatus," dictionaries say, means divine inspiration. If a president feels that his policies come from divine inspiration, he, more than most, would seem to need unbiased, informed views on the effects of his policies abroad. Many "political" ambassadors

have such qualities. I had the opportunity of serving under James Conant when he was ambassador to West Germany. He came to that position after being president of Harvard, with a reputation as an outstanding scientist. He was also a scrious student of international affairs and devoted to understanding and protecting American interests. He and Mrs. Conant were fluent in German. They sought out key individuals in West Germany and Berlin and exchanged views with politicians, business persons, academics, union officials, intellectuals and

others. They were respected. His reporting to Washington was precise and relevant, without shading of opinions to please the Eisenhower administration. Like many other "political" ambassadors, he represented the best of America. A glance at key ambassadorial posts at present would indicate that there are many unqualified ambassadors, and very few like Mr. Couant.

signments: to the OECD in Paris. to the European Communities in Brussels and Luxembourg, and to Brazil. The opportunity for spend-

ing money at those posts was un-limited. However, I found, with some very minor exceptions, that government-appropriated funds were sufficient to cover all essential entertaining for me and my staff.

Mr. Buckley notes that James. Gavin, when he resigned as ambas-sador 10 France, advised President Kennedy, "I just can't afford it." Mr. Gavin left and became chairman of Arthur D. Little. No doubt that paid better than being ambassador to France, but it does not mean that allowances in Paris are insufficient to cover essential representational expenses. Charles Bohlen, Mr. Gavin's distinguished successor, was not a "rich" man, but

> and did not impoverish him. I have been told that Arthur Burns, one of the outstanding political appointees of the Reagan administration and one who served in a critical embassy (Boan, 1981-1985), says he fails to understand this enduring myth that only the rich can be ambassadors.

his performance as ambassador to

France was more than successful

I will not comment on Mr. Buckley's views on the role of Ambassador Faith Ryan Whittlesey and her fund from private sources, aside from repeating that neither she nor any other U.S. ambassador really needs such a fund. Surely the represcutational demands in Bern are not greater than those in Pana, Brussels and Rio de Janeiro.

As to the alleged need to have a "rich" ambassador, it is nonsense. I have had three ambassadorial as-The writer, a career Foreign SerCAINT PETERSBURG, Florida -Next week an airplane will be hi-

jacked and the passengers, many of them American, will be taken hostage. If not next week, then the week after or next month or the month after that, But it will happen, for two reasons.

Terrorism, old in warfare, has been developed by nationalist and carefully nurtured religious fanaticism to the point where it is a weapon not simply of local resistance but of world impor-tance. The terrorists have discovered that it is far more effective to select victims from the nationals of foreign powers rather than concentrate merely on their specific enemies.

Nothing gets them more attention and blackmail power than the horror of an airplane hijacking, not even the kid-nappings taking place now in Beirut. And most of the victim nations have

shown that they crack when hostages are taken. The United States cracked to Soviet hostage-taking by trading a Soviet spy for an American newsman. It delivered blackmail arms to Iran, sponsors of the killers of American marir

Pakistan has yet to put hijackers captured five months ago on trial or even tell the world who they are. Israel cracked by turning over 1,150 prisoners for three Israelis.

Italy let a hunted terrorist escape. The French dealt aimost openly in trading with terrorists for their hostages. Anybody who says this contemptu-ously is a fool. We all know that were one of our family taken hostage, we would want only one thing of our gov-ernment — rescue. But the surrenders

do lead, bitterly, to more hostage taking and more pain for more families, Once again the frightened faces of the victims will appear on television screens the world over. Once again the captors will orchestrate their own performance on the television stage, screaming and waving automatic rifles one day, presenting their demands and their griev-

It is not provided

the settled at other

ances as winningly as they can the next. Once more, disgusted viewers and harassed governments will say that the press, particularly television, is terrorism's tool and is endangering the lives of the hostages. Louder than ever will come demands for some form of regulation outright consorship, barring reporters and cameras from the scene, or sweeping

Television producers and correspondents and newspaper people talked it all over at a meeting here organized by the Poynter Institute for Media Studies, which owns The St. Petersburg Times, one of America's good newspapers.

Letters intended for publication should be addressed "Letters to the Editor" and contain the writer's signature, name and full address. Letters should be brief and are subject to editing. We cannot be responsible for the return of unsolicited manuscripts.

By A.M. Rosenthal

The question on our minds was whether the long, wearing hijacking cov-erage in Beirut in 1985 had endangered the lives of the hostages or made freeing the captives more difficult. To his own professional credit, Parker Borg, a State Department anti-terrorism expert at the time, said that the answer was no.

But during next week's or next month's hostage taking, the debate will start all over again. Television does not enjoy all the First Amendment protections - I believe it should - and the ressure will be heavy.

There are things that can be done that

would not damage the right of television to present the news fully and would help prevent it from becoming the most im-portant hostage of all.

Occasionally the gunmen get control of television by being broadcast live, spouting whatever they wish to spout. This is exactly as if gunmen marched into a newspaper office and dictated to reporters and editors every word that was to appear in print. Pausing to see and edit tapes in advance is no more an act of censorship than a newspaper edi-

tor looking at a story before it is printed and using something called judgment. Terrorists feed hungrily on chaos and

press-television mob scenes create the hysteria they seek. Television could help by using correspondents but just one or two camera crews, sharing film but not

the reporting or commentary.

Almost all American television anchormen and producers are skilled, experienced and serious and could hold down top jobs on newspapers; greater praise hath no editor. But sometimes the job of interviewing captors is turned over to television personalities who are simply entertainers and treat the captors as statesmen: "Do you have a message for President Reagan?"

These steps would counter some of the intricately planned manipulation by the terrorists. But television and press ashing will continue. It won't kill us. Neither will it change the fact that the

agonizingly drawn-out pain of captives and family has come not from television cameras and anchorpeople or newspa-per reporters but from the faltering will of governments and the men you see waving their rifles and sneering at the world, next week or next month. The New York Times.

The Great Picture on Page 4 Knocks Phones Off the Hook

By Joseph Laitin

ism is a mirror of life around us. The question is often a matter of taste, sometimes of ethics, always of truth. How far an editor should go to protect the reader has been an ongoing in-house debate since the birth of the free press. I am not sure there is an answer, except to treat each incident separately.

The incident now at hand is a photo of the Pennsylvania state treasurer, R.

MEANWHILE

Budd Dwyer, who executed himself on camera during a press conference. The photo, taken at the split second of bullet impact, appeared in The Washington Post on Friday. The newsroom phones went off the book. (A different picture, showing Mr. Dwyer with the tip of the barrel in his mouth before he pulled the pistol's trigger, appeared on Page 2 of Friday's International Herald Tribune.)

Mind you, there was not one single protest against the use of a photo the

fact. There is no acknowledgment, for instance, that the Vatican's refusal to

accept Israel's occupation of Jerusalem

WASHINGTON — Good journaljern is a primage of life annual untragic aftermath of the Philippine farmers' demonstration near the presidential palace in Manila, where they were fired on by troops. The New York Times, which elected not to publish the offending suicide picture, also used that photo of the Manila massacre on page one. There is a long history of editorial

decision, or indecision, on when to print details or photos of news events that might turn the stomach of readers. The two most often used arguments against publishing unpleasant details are that readers want to enjoy their breakfast and that children should not be exposed to sordid tragedy. The latter argument does have validity, but when you consider the violence tolerated every day on television you wonder about the agenda of those who present this argument.

Looking back over the years, I recall the photo that made Robert Capa fam-ous: a loyalist rifleman in the Spanish civil war catching a fatal bullet in midair as he was leaping for cover. Editors said Great picture" and printed it.

During the Budapest uprising there

was a memorable picture of an im-promptu sidewalk execution of some dreaded secret policemen, their eyes in wide-open surprise and hair straight up as if they had just received a thousandvolt charge. It was widely printed and

hailed as great photo journalism.
It can be argued that those pictures were taken during war or revolution or aprising, which makes a difference. What appeared on page four of The Post was a suicide. That is true, and there most certainly is a difference. But l would suggest that the real reason why the other photos were viewed as great photo journalism, and not as horror pic-tures used for exploitive purposes, is that they came from distant places that, as everybody knows, are inhabited by foreigners. This was home, which calls

for a different measuring rod for taste. Maybe so, but there are other arguments to be made. For instance, was the picture essential to the story? There is a question of both ethics and taste involved in these decisions, and sometimes it is necessary for a conscientious editor

to make a decision that forgoes taste. This is a matter that has to be dealt with on a case-by-case basis, and I am not wise enough to offer any meaningful guidelines that would bold up over a period of time. In this instance it was a close call. But I can see how any twofisted editor, facing a deadline and an agonizing decision, would have felt that he had to go with it and apologize later, if he felt any pangs of conscience. And next time face the problem anew.

The writer is ombudsman of The Washington Post, from which this is adapted.

LETTERS TO THE EDITOR

The Vatican, Israel and a Hard-Hitting Columnist

The opinion column by George F. breakthrough on the issue of Israel's Will concerning Cardinal John O'Conlegitimacy, many more decades of denor's recent visit to the Holy Land is struction will pass. offensive. In addition to vilifying the cardinal. Mr. Will makes vituperative criticism of the Vatican, the present pope, the Catholic clergy and the politi-cal policy of the Catholic Church. He

concludes with a thinly veiled comparison of the Vatican to Nazi Germa The tragic situation in the Middle East requires men of peace like Cardinal O'Connor. It is not helped by the opinions of angry and irresponsible men.

FAITH M. COSSA. George Will's splendid essay makes many excellent points against the Vati-can's refusal to recognize the Jewish state. How refreshing it is to see these words in print from a Gentile pen. Many a Jew would ching from confronting the Vatient on thing time.

Varican on this point.

Meanwhile, as Mr. Will says, moving the U.S. Embassy to eastern Jerusalem would end the pretense that the unity of Israel's capital is negotiable, and would show the world that the United States is ready to stop appearing Arab opinion. His argument is that American interest in peace in the Middle East can best be served by a clear demonstration that Israel's greatest ally and sponsor no longer implicitly condones Arab propaganda to the effect that Israel's sovereignty is open to question. Without a

Regarding "Cardinal's Pilgrimage Covers Something Sinister" (Jan. 16):

Arlington, Virginia.

The point Mr. Will makes is as erroneous as his supporting "facts."

The Vatican is the only state that continues to honor the original agree-ment for the acceptance of Israel as a

nation. That agreement calls for internationalization of the city of Jerusalem and for repatriation of, or compensation the absurdity of the universe but rather for, the Palestinians. The Vatican does as providential purifications necessary not have diplomatic relations with Israel in the formation of a chosen people. because neither of those two conditions has been met. The United States, Britain and other countries continue to honor the first condition, maintaining only consular offices in Jerusalem, but they ignore the second issue about Palestinian rights and they maintain full diplomatic ties with Israel.

Jewish gravestones were not used by Jordan to pave roads, but an Arab cemetery was buildozed to create Independence Park in Jerusalem. Religious freedom in Israel exists only in the minds of some, since Christian and Moslem Arabs from all Arab countries except Egypt are refused entry into Israel.
I agree with Mr. Will that the cardinal's visit disclosed something sinister

but not in the Varican.

MARIE PECK.

In the past I have admired what ap-peared to be the lucidity of Mr. Will's thought. Some of his columns have been minor masterpieces — for instance, one a few years ago on children with Down's syndrome. Here, I thought at the time, was a man of real humanity. What, then, is this sudden, rabid and illogical attack on the Catholic Church?

Mr. Will suggests that Jews are incapable of comprehending how the sufferings in the Holocaust could be a "gift to the world." Yet if any of the world's peoples are well versed in suffering, it is the Jews, and in the Biblical context their sufferings are not seen as proof of the absurdity of the universe but rather

More shocking is the technique Mr. Will uses to criticize the Catholic Church: insignation. This has traditionally been the weapon of the racist and the bigot. The Vatican has never given Israel diplomatic recognition. Here is a policy that merits debate. But no. Instead we are sold that behind the fact "furks something sinister."

And who is trying to resurrect the "hoary myth" of collective Jewish guilt? I have not heard anything like that from anyone in the Catholic Church. I don't believe I have heard it from anyone at all lately - except Mr. Will.

The column does a disservice to the Jewish state, because no cause is served by support which can only be seen, by those who have an intelligent interest in the question, as emberrassing. Nor does it serve the interests of intelligent, logi-

cal, loyal debate - without which no disputed questions, international or otherwise, can ever be resolved.

PEGGY RIGAUD. Montpellier, France. Three cheers for George Will! He has

the guts to bring into the open the long history of the Vatican's malevolence toward the Jewish people. Cardinal O'Connor's condescending tone and utterly incomprehensible re-

mark that the Holocaust was a gift to the world reflect his church's politics. There were Jews in Jerusalem 3,000 years before the first followers of Christ began calling themselves Christians.

EDWARD & DORSON. Gilleleje, Denmark.

Mr. Will concludes his criticism of Cardinal O'Connor and the "sinister" Vatican by saying: "Israelis have heard [the cardinal's] alibi before: He was only obeying orders." Apparently Mr. Will does not follow developments in Israeli politics closely. The head of the Israeli central command commented recently, about the shooting of a 14-year-old at a refugee camp, that the Israeli soldiers appeared to have "obeyed regulations with regard to opening fire." Cardinal O'Connor's statement about

the Holocaust being a gift of Judaism to the world is indeed absurd. However, to one familiar with the issues, it is clear that Mr. Will's object is not information. His column is typical of pro-Israel rhetoric, in that its intent is clearly to

arouse emotion with little reference to

er contributes to economic growth, global solutions should be tried. Even countries close at hand - Poland, for one might look at the idea with interest,

K.J. LOROCH.

1987good reasons to see Thailand this year.

Majestic temples and magnificent elephants, glittering roofs and garlands of orchids, enchanting people and exotic cuisine...one could write a long book about the land they call Thailand (and many seasoned travellers have). And never has there been a better year to see Thailand than 1987. For this is Visit Thailand Year in the Land of Smiles.

Among the kaleidoscope of festivities planned for 1987 you should try to catch some of these:

Feb. 13-15. Chiang Mai Flower Festival A million blooms, a thousand smiles. One of the unforgettable moments of your life.

April 13. Songkran Festival. A nationwide water festival celebrating the Thai Lunar New Year.

May 9-10. Bun Bang Fai Festival. "Bang!" indeed. Held in northeast Thailand, a fireworks show like no other you've ever seen.

Oct. 16. Royal Barge Procession. An armada of brilliant colours, pageantry and rare splendour not to be missed.

Nov. 5. Loy Krathong. Celebrated nationwide, this is Thailand's loveliest festival.

Nov. 14-15. The Elephant Round-Up. Ever seen 100 elephants enact a medieval War Parade? You will if you come to Surin in northeast Thailand for this extraordinary display.

Nov. 22. Bangkok Marathon. A major sporting event commemorating His Majesty the King's 60th Birthday Anniversary.

Dec. 15. Light and Sound Presentation. A glittering occasion to be held at the Royal Grand Palace and the Temple of the Emerald Buddha.

These are only a small selection of the truly stun-

ning special events that mark 1987 as Visit Thailand Year - a year full of festivities, flowers and fireworks. Make your holiday plans now. And make sure

you fly on Thailand's own airline, Thai International

SCIENCE

IN BRIEF

Drug Seen as Potential Contraceptive BOSTON (UPI) — A drug shown to be effective as an abortion pill also has promise as an oral contraceptive that may be more convenient,

effective and safe than existing forms of birth control, government

A new study showed that the experimental drug RU-486 was highly effective at controlling menstrual cycles in women and preventing preg-nancy in female monkeys. There were no apparent adverse side effects. although past trials showed some women experienced excess bleeding.

"This is a preliminary study, but it suggests that there's a big potential

for this drug as a contraceptive agent," said Dr. Lynnette K. Nieman. who led the study at the National Institute of Child Health and Human Development. RU-486 is a synthetic steroid that blocks production of the bormone progesterone, needed to maintain a fertilized egg in the womb.

Fatty Acids Linked to Heart Disease

LONDON (Reuters) - Heart disease may stem from a deficiency of essential fatty acids in the diet and not excess consumption of saturated fats, a new study by scientists in Scotland suggests. A report on a study involving more than 6.000 people, published in the British medical journal The Lancet, said that people who had suffered from heart attacks or pains had less essential fatty acids in their body fats than other people. Essential fatty acids are contained in fish and vegetable oil, while saturated fats in the diet come mainly from animal food.

"Until now the evidence has appeared to suggest that heart disease is caused by eating too much saturated fat." said Michael Oliver, professor of cardiology at Edinburgh University. "Our research suggests it is the deficiency of polyunsaturated fat which is important."

Rare Animal Rediscovered in Brazil

NEW YORK (AP) - The thin-spined porcupine, feared extinct, has been rediscovered in Brazil's rapidly disappearing Atlantic coastal forest. The animal, Chaetomys subspinosus, is about the size of a small cat and is covered with soft, brown spines that resemble the bristles of a broom but are more flexible, according to Russell Mittermeier, vice president of the

The animal, was first described in 1818 and last seen in 1952. Researchers know so little about it they cannot even be sure that it is a true porcupine, Mittermeier said. "The scientific interest of the beast is that no one is sure what it really is," he said.

U.S. Drinking Habits Show Shifts

NEW YORK (NYT) - About two-thirds of adult Americans drink alcoholic beverages regularly, but 10 percent of the drinkers down half the total alcohol, according to a new study. In addition, the age at which people begin to drink is falling: "In 1984 more than 30 percent of high school seniors reported having tried alcohol by age 13," according to the Statistical Bulletin of the Metropolitan Life Insurance Co.

Nationwide, Americans over 13 drank beverages containing an average of 2.65 gallons of alcohol in 1984 Companying was highers. 5.24 callons

of 2.65 gallons of alcohol in 1984. Consumption was highest, 5.34 gallons a person, in Washington, D.C., although purchases of low-priced liquor by non-residents accounts for part of that. Consumption was lowest in Utah, at 1.53 gallons a person.

Since 1968, beer has been the main form of alcohol consumed in the country, and 51 percent of alcohol consumed in 1984 was in beer.

Antibodies Redesigned

By Harold M. Schmeck Jr. New York Times Service

NTIBODIES, the most famil-Aiar of the body's defenders against infectious disease, are being drafted into new roles.

Antibodies are being rebuilt by scientists who hope to use them for slicing and redesigning proteins, the body's most varied and important substances, for poisoning cancer cells and for performing other

roles that nature never contrived. "If we can harness this vast array to do chemical work," said Dr. Richard A. Lerner, director of the Research Institute of Scripps Clinic, La Jolla, California, "antibodies will take on an important new dimension in biology and chemistry."

An antibody capable of cutting a protein, for example, might be aimed at the protein coat of a virus. Such antibodies might be injected in a virus-infected patient to chew up the viruses and halt the infec-

Emerging strategies in the exploration now under way include: the production of antibodies that are hybrids between mouse and human, of antibodies armed with potent cell poisons to send as guided missiles against cancer cells, and of antibodies of radically new design that may prove more efficient or easier to produce.

Antibodies, y-shaped proteins less than a millionth of an inch ed missiles. They seek out targets with incredible precision among the myriad substances in the body. A single antibody-producing cell can make 2,000 a second to alert the defense system and help destroy an invader. Enzymes, the chemical work-

horses of the body, have innumerable functions, including cutting things apart, pasting them together or changing them in various other ways. Putting their functions into antibodies, researchers say, could create a new scientific tool of great potential power.

Two scientific teams, those of Dr. Lerner and of Dr. Peter G. Schultz of the University of California, Berkeley, have demonstrated, in different ways, that an antibody can function as an enzyme.

The development of enzymatic antibodies could have even broader potential, both as a scientific tool and as a way of making proteins that have never existed before.

"Being able to andify proteins portant goal for both chemists and Kim D. Janda and Dr. Leruer, all clot. Such an enzyme might be able biologists and antibodies might let of the Scripps Clinic and Research to relieve the arterial blockages that

Proteins are among the main structural and functional substances of the body; they are major ingredients in all living tissues and indispensable factors in the body's countless chemical reactions that go on continuously from concep-tion to the dissolution that follows death. Antibodies and enzymes are

themselves specialized proteins. Most of the work involves monoclonal antibodies. These are antibodies grown from specifically chosen clones of cells. All the antibodies produced from any single such clone are identical. Ordinary antibodies are much less uniform.

An antibody can distinguish easily between two different viruses or two different structural features on the same virus, different human blood types, different proteins and many other even more subtle differences. By coupling with its target, the antibody does not ordinarily kill it, but rather activates a parrage of defensive actions by other elements of the immune system.

While enzymes often serve the body by cutting things apart, they are actually biological catalysts that speed the pace of chemical reactions. Something that might not happen in 100 years without an enzyme can be done in less than a second with one.

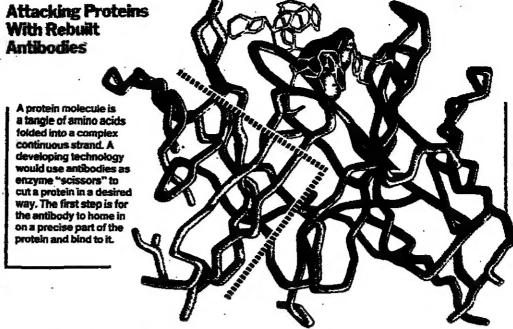

A natural, uncatalyzed, chemical reaction goes in two directions, one of which is toward a more stable long, are the body's defensive guidstable product wins out. A catalyst does not change the chemical reaction but permits it to go rapidly to the stable form.

Between the two states is an unstable form of the substance involved in the resction. Enzyme-like antibodies would home in on this transition state and couple with it, permitting the reaction to go toward the stable side rapidly. But the transition state is ejusive.

Therefore the research strategy at Scripps has been to determine its chemistry, make a stable counter-feit in the laboratory and inject this into laboratory animals so that they produce antibodies to it. Independently, the scientists at

Berkeley discovered that one particular antibody can act as an enzyme in cutting a common organic chemical called a carbonate. Some natural enzymes that also

cut the simpler substances used in the experiments will cut proteins, suggesting that protein-cutting antibodies can be developed. Dr. Alfonso Tramontano, Dr.

signed to act like an enzyme it will complete its action by changing the protein in a preordained way. For example, such an antibody could cut the surface protein of a virus, rendering it harmless.

If the antibody is de-

hybrids or not, may allow scientists to design antibodies virtually to or-

The first report of producing mouse-human hybrids was from a team of collaborating scientists at three institutions, Dr. Morrison from Columbia, Dr. M. Jacqueline Johnson and Dr. Leon Herzenberg of Stanford University School Medicine and Dr. Vernon T. Oi of the Becton Dickmson Co.

Plans are in progress to test such hybrid antibodies in treating cases of multiple sclerosis, colon cancer and perhaps other diseases.

For several years, scientists have experimented with use of antibodies directed as precisely as possible against a patient's cancer lissues.

Paris Fashion

Saint Laurent, the Giant

By Hebe Dorsey International Herald Tribune

PARIS — Nothing like a nice
surprise! The fashion press expected to all but bury Yves Saint
Laurent, whose talent tately had

seemed distinctly on the wane. Instead, the designer demonstrated Wednesday that when he wants, nobody can touch him. In a beautifully edited and re-strained collection, Saint Laurent

proved once again to be the giant in his field. His fans, including Cath-erine Deneuve, Paloma Picasso and — in a rare fashion appearance — Danielle Mitterrand, heaved a big sigh of relief and appleuded gratefully. Also there was the designer Claude Montana, acknowledged leader of French ready-to-wear,

who was moved to tears.

This takes nothing away from the new name in Paris, Patou's Christian Lacroix, but it is as if the two designers were standing at either end of the fashion spectrum. Lacroix has the youth, the enthusi-asm and all kinds of unexplored avenues before him. Saint Laurent has said and done practically everything and all he has to do now is say it again, in his own pure, per-fected hand. But Lacroix is the fu-

After the show, the designer said that he had had fun with this collection, which was also very young an element that had been missing achieved by revamping the proportions, strengthening shoulders and considerably shortening skirts until they became minier than mini.

Saint Laurent stayed away from the excessiveness of Paris trends with clothes that were perfectly flat and wearable, especially the strong-shouldered suits. These had a long, new jacket with two big pocket flaps sewn sideways. They turned up in every possible fabric, from tiny checks to crisp linens and in every color, from gray to a bright purple.

But beautiful as they were, they were not the most exciting part of this show. As for pantsuits, they were frankly boring. In short, the daytime clothes at Saint Laurent's, including the chemises and tunics, belonged to the new, upgraded Saint Laurent Rive-Gauche, which Pierre Berge, Saint Laurent's part-ner and business manager, said was definitely going to happen. This was confirmed by Léon Cligman. the French industrialist who is the largest stockholder of Saint Lau-

in the back. The front was quite naughty, cut all the way to the crotch. Some minis had been circled with stiff black bows. The prettiest were made of body-con-scious, waffled chiffon, decorated with tiny wavy ruffles. The feeling was very little-girl-out-to-a-party, especially when Saint Laurent circled the hips of a printed chiffon mini with wide satin ribbon and a big side bow. The shorter dresses were newer and more fun than the long ones. Saint Laurent, who did the bustle well before anybody else, did not bother with elaborate construc-

WALL STREET WATCH

Individual Investors Begin Chasing After the Bull

B_y Vartanic C. Vartan

New York Times Sernce

EW YORK — The small investor is coming back. Tempted by a bull market streak that is verging on a record, Wall Street's retail customers are stepping out on their own to buy stocks at a faster clip than they have for several years. The growing enthusiasm is nowhere near the frenzied activity of the go-go days of past decades. In fact, so far the rise of the Dow Jones industrial average this year has been fueled by institutional investors who have long dominated the market.

Individual investors have clearly given the market an extra boost, however. And a number of stockbrokers have described these investors as nibbling at low-priced stocks while continuing to pour more money into

"We see speculative activity heating up a bit, but it certainly is "People like what nowhere near the boiling point," said Leslic Quick 3d, president of Quick & Reilly, a leading discount brokerage firm. December was the firm's biggest month ever. And so far in January, Mr. Quick said, volume is running 20 percent higher. "Our gross revenues in over-the-

they are seeing in the stock market, but uncertainty."

counter stocks are running more than double last year's rate," said Peter DaPuzzo, director of retail equity trading at Shearson Lehman Brothers, "Our volume - 60 percent retail and 40 percent institutional — is far above normal. But we are not yet in the wild-and-woolly stage in over-the-counter activity."

The over-the-counter market, where small investors have traditionally

looked for fast gams, was a relatively poor performer in 1986, when blue-chip stocks captured investors' fancies. But in January, this sector has rebounded sharply.

Early this year, Shearson Lehman assembled a list of "fallen angela," including such over-the-counter issues as Cronus Industries, Apogee Enterprises, and Bay View Federal Savings & Loan, as suggested trading stocks. "We had a tremendous response from retail investors," Mr.

Retail investors' greater interest in individual stocks is not curbing the boom in equity mutual funds, either. Net sales of the eight equity mutual funds of T. Rowe Price Associates this month are 23 percent ahead of the comparable December period, in part because of the inflow of funds for Individual Retirement Accounts.

TTHE same time, mutual fund investors are switching out of safer a money-market funds into their equity counterparts. "Our share convers have switched out of money-market funds to the time of \$113 million this month, and \$111 million of this sum has been exchanged the state of the sum for shares of our equity funds," said Steven E. Norwitz, a vice president at T. Rowe Price. "Nearly half of that money went into the New Horizons Fund, which invests in small growth companies."

Merrill Lynch, the largest American brokerage firm, reported that both its cash-account and margin-account customers bought more shares than they sold during the first week of 1987. These investors were buying approximately 100 shares for every 70 shares they sold. But since that opening week, clients have switched to the sell side, disposing of about 100 shares for every 70 shares purchased. To some market watchers, this lack of clear commitment indicates that the public remains skeptical that stock prices will continue to climb without at least a temporary setback.

"People like what they are seeing in the stock market, but they also feel a lot of uncertainty," said John DeLong, manager of Merrill Lynch's branch office in Sacramento, California. "Our volume in January is up 15 percent or 20 percent over last year, but the buying and selling is pretty evenly balanced. Some customers are still taking their capital gains. But others are asking, "How long should "hold on?"

"We have some house of long stocks had as a sense in legislation."

"We have seen some buying of low-priced stocks but, as a general rule, clients are staying with quality," said Charles Cameron, who manages a Portland, Oregon, office for Smith Barney, Harris Upham & Co. "There exists a certain excitement about the market, but you have to realize that people in Oregon are more the show-me type."

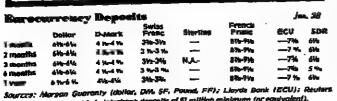

And what are retail customers buying? "The public is buying big-name stocks like General Electric and Coca-Cola, and some people are picking up low-priced over-the-counter issues See STOCKS, Page 13

In Year Result Called 'Satisfactory'

PARIS - Elf Aquitaine, France's government-owned oil and chemicals giant, said Wednes-day that the combined impact of and lower oil prices caused profits to decline 19 percent last year, to an estimated 4.3 billion francs (about \$715 million at current ex-

change rates).

Michel Pecqueur, Elf Aquitaine's chairman, said the result was "satisfactory," considering a 50 percent drop in crude oil prices and a 16 percent decline in the dollar's value against the franc last

In 1985, the company reported a profit of 5.3 billion francs. Earnings from exploration and

a 400 million franc loss in 1985.

Group sales fell 36,4 percent, to 115 billion france in 1986, as oil and gas production declined 5.4 percent, to 54.4 million tons of oil equivalents, Elf said.

The company produced 27.9 million tons of crude, the same as in 1985, while gas production fell 10.8 percent from year-earlier levels, to 26.5 billion cubic meters.

U.S.-EC Grain Dispute Boils

Over Into New GATT Talks

A Growing Taste Some of the Australian beers For Foster's competing in the American market, representing a small 1.5 U.S. sales of the Australian

Australia Taps U.S. Beer Market As Sales Dry Up at Home, Breweries Hurry to Export

By Richard D. Lyons New York Times Service

MELBOURNE — Aggressive marketing, good timing, luck and a dark little secret that Crocodile Dundee doesn't tell his American friends are combining to make beer exports to the United States an irresistible opportunity for Australian brewers. Indeed, lately there has been a scramble to enter

the U.S. beer market, and even such little-known names as Cooper's Big Barrel and Southwark's Broken Hill Lager are elbowing Swan Export and Foster's Lager for the attention of the U.S. beer

The competition is becoming so heated that several of the main players are refusing to disclose either sales figures or profitability, preferring boastful news releases. One from Carlton & United Breweries Ltd. promises that the company is going to "Fosterize" the world with its best-selling

Foster's Lager is by far the best-selling Austra-lian beer in the United States. It is known for its aggressive television campaign featuring Paul Hogan, who played the title role in the hit movie

This is probably because Foster's so nearly mimics the American taste for lighter beer, which is no coincidence, because what Mr. Hogan has not mentioned in the television commercials is that it was first brewed in Australia a century ago by two New York brothers, W.M. and R.R. Foster. They arrived from Manhattan in 1886 and

sensed a market in this hot climate for chilled lager rather than the heavier ales popular at the time. So they sent to New York for brewing equipment, became successful with their new product, sold out and returned home at the end of the century.

Shrugging off these historical origins, Foster's officials are crowing over their success in the United States, although they decline to be specific about sales figures.

Last year, according to Beer Marketer's Insights, an industry newsletter based in West Nyack, New York, the company sold an estimated 1.8 million cases of Foster's in the United States, more than double the volume in 1982. Last year's sales represented about 90 percent of all the Australian beer shipped to the United States, the newsletter said. Australian beer is still only a drop in the bucket

of U.S. beer sales. It represents only about 1.5 percent of import sales, which, in turn, are less than 5 percent of total U.S. beer sales. Nonetheless, imports, of which there are about

400 brands, are growing fast. And the growth of Australian beer sales in the United States was part of the reason that sales of imported beer last year grew to about 4.8 percent of total beer sales from about 4 percent in 1985, according to Beer Market-

Peter T. Bartels, the managing director of Carlton & United Breweries, was quick to point out See BEER, Page 15

Dollar's Plunge Continues as G-5 **Rumors Swirl**

LONDON - The dollar fell sharply Wednesday in hectic trading fueled by rumors of central-bank intervention, interest-rate cuts and the possibility of an early meeting of Group of Five finance

ministers.

The U.S. currency slipped to its lowest point against the Deutsche mark in six and a half years before recovering a bit in Europe. Dealers said there was plenty of room for it to fall further.

The dollar traded as low as 1.7670 DM early in the day, down 3 pfennigs from Tuesday's London close, before coming back up at the close. It also fell below 6 French

francs, an important support level, for the first time in more than five Dealers attributed the plunge to bearish sentiment on the outlook for the U.S. economy combined with a belief that the Reagan ad-

ministration was willing to let the currency drift further. But rumors of an emergency meeting of the Group of Five industrial nations - the United States, Japan, West Germany, Brit-

ain and France - sparked a temporary recovery. The dollar also firmed on rumors of central-bank intervention. though dealers said they did not detect central banks in the market.

The dollar fell back again, as officials from three countries denied that a G-5 meeting was immi-

The West German Bundesbank did

not intervene at the fix in Frank-

In London, the dollar fell to 1.7860 DM from 1.8078 on Tuesday; to 5.9600 French francs from 6.0330, and to 1.5010 Swiss francs from 1.5168. It was unchanged against the yen, at 151.55. The British pound firmed to \$1.5390 from \$1.5340.

In earlier European trading, the dollar was fixed in Frankfurt at 1.7754 DM, down more than 4 pfennigs from 1.8195 on Tuesday, and at 5.9250 French francs in Par-

is, down 15 centimes from 6.0735. In Zurich, it closed at 1.4885 Swiss francs, below the key support level of 1.50, compared with 1.5245. At midsession in New York, the dollar was trading well below Tues-

day's closes. Wednesday's rumors about a G-5 meeting apparently began when Satoshi Sumita, the governor of the Bank of Japan, said at a business seminar in Tokyo that the five in-

Sumita Appeals To U.S. to Help Stabilize Dollar

Agence France Presse TOKYO — The United States needs Japanese institutional investors to fund its budget deficit and should build confidence by stabilizing the dollar, the Bank of Japan's gov-

ernor said Wednesday.
"Even for the United States. stability on the exchange market is important in securing a smooth inflow of capital," Satoshi Sumita said at a business seminar, "It is a plain fact that the United States is worried that the higher ven might reduce Japanese investment

An executive with a Tokyo bank described Mr. Sumita's re-marks as "exceptional" and said they indicated a "call on U.S. officials to refrain from making remarks that would

lead to a higher yen."

Mr. Sumita also indicated that Japan would cut its basic interest rate soon. For the past two weeks, speculation about an imminent cut in the discount rate has mounted. The cut is widely expected to be half a percentage point, to 2.5 per-

U.S. Weighs Charging Airbus With Untair Trade Practices

WASHINGTON - The U.S. government is ready to file unfair trade charges against Airbus Indus-trie if the West European consor-tium goes ahead with plans to build new airliners to compete with the MD-11 built by McDonnell Douglas Corp., U.S. officials said

Two senior U.S. trade officials are to meet Feb. 2-4 with officials

on some EC agricultural products

than enough concessions" in bilateral trade talks with the United

of France, West Germany and Britain, the three governments provid-ing most of the support for Airbus. The meetings, in Paris, Bonn and London, are to be part of an increased effort to block Airbus's inroads into U.S. dominance of the commercial aircraft industry.

These governments will be asked to curb their financial support for sales and production of the proposed A-330 and A-340 series.

Long-standing U.S. complaints against Airbus include charges that planes are sold below their production costs and that inducements, such as landing rights, are offered if foreign airlines buy Airbus aircraft.

The U.S. delegation to Europe will be headed by Bruce Smart, undersecretary of commerce for international trade, and Michael B. Smith, a deputy U.S. trade repre-

One charge the United States is considering filing falls under a pro-vision of the General Agreement on Tariffs and Trade. It says government subsidies must, over the long run, give an industry a reasonable chance of making a profit.

Airline specialists say that West Germany, France, Britain and, to a far lesser extent Spain, have put about \$15 billion into Airbus Industrie since 1970 and that the company and its planes have yet to make a profit.

U.K. Had Deficit On Balance of Payments for '86

LONDON -- Britain said

Wednesday that it had a balance-of-payments deficit of £187 million (\$285 million) last year, its first such yearly deficit since 1979. But for December it posted a

belance surplus of £38 million. which was better than expected, after November's large deficit of £232 million, the Depart-ment of Trade and Industry reported. The balance of payments includes total foreign trade in goods and services, plus the flow of gifts and for-eign aid, capital loans, official settlements and reserves.

For the fourth quarter, the deficit narrowed to an adjusted £229 million from £781 million in the third quarter.

The government had forecast a £3 billion surplus for the year, but in November it revised that to a balance of zero, citing the drop in oil prices and an increase in manufactured im-

The oil trade surplus nar-rowed to £4.144 billion last year from £8.163 billion in 1985. Imports rose 1.5 percent to a re-cord £81.343 billion, while exports fell almost 7 percent to £72.663 billion.

U.S.-British Bank Pact **Under Study for Legality**

By Tony Carriet

BRUSSELS - The European Community Commission has expressed concern to the British government over the legality of a pact on banking supervision that Britain has reached with the United States. sources close to the commission

said Wednesday.
They said that Britain might have violated EC law by agreeing to the pact with Washington. Announced earlier this month, it was described then by the Bank of England governor, Robin Leigh-

Pemberton, as a "landmark in international supervisory coopera-Lord Cockfield, the EC commissioner for financial institutions, has told the British chancellor of the

Exchequer, Nigel Lawson, that the

accord is being studied by the commission's legal experts, the sources Lord Cockfield said he was reserving final judgment pending the study, they added.

The accord, which seeks to standardize international banking, sets out rules on the minimum level of capital that banks should have to cover their risks.

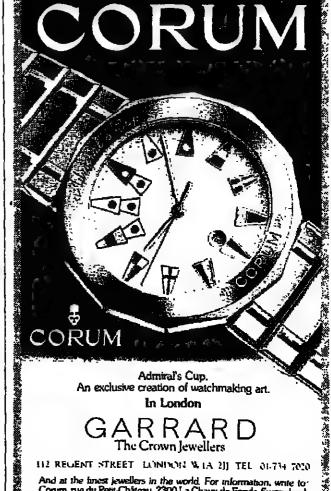

covered in the agreement were almost exclusively the sole compe-tence of the EC Commission, the 12-country organization's execu-

tive authority.
Where the commission has competence, bilateral accords with third countries violate community law," a source noted. Commission officials were also

annoyed by what was described as Britain's apparent disregard of its EC partners in making a private arrangement with the United States, the sources said. The agreement coincided with EC efforts to standardize supervi-

sion of banking practices as part of the drive to establish a harrier-free common market for goods, services The EC has, for example, already made a proposal to standardize the technical issue of what constitutes a bank's "own funds," a matter dealt with in the London-Washing-

ion agreement, the sources pointed But, the sources continued, the issue is clouded by uncertainty over how formal the agreement, between the Bank of England and the U.S. Federal Reserve, actually is.

And at the finest jewellers in the world. For information, write to Corum, rue du Petit-Château, 2300 La Chaux-de-Fonds, Suitzerland.

Registered Office: LUXEMBOURG, 14, Rue Aidringen. Commercial Register: Section B nº 23663.

a) the management report of the directors; b) the report of the statutory auditor. the report of the statement of assets and liabilities and statement of operations for the year ended September 30th, 1986 and to consider

To discharge the directors and the auditor with respect to their performance of duties during the period ended September 30th, 1986.
 To elect the directors to serve until the next annual general meeting of

The Associated Press

MIAMI BEACH — Daily newspapers in the United States can expect advertising gains in 1987 very similar to those in 1986, Craig Standen, president of the Newspaper Advertising Bureau, said Tuesday. day.
Mr. Standen, speaking at the annual winter sales conference of the International Newspaper Advertising and Marketing Executives, forecast a 5 percent rise in national advertising, 7 percent in retail and 8 percent in classified advertising. for an overall growth of 7 percent.

VIENNA - An Austrian bank, Zentralsparkasse und Kommerzialbank, Wien, said Wednesday that it had received £254,000 (about \$390,000 at current rates) as compensation for losses from an investment in Guinness PLC shares and that it was investigating the circumstances of the payment

Guinness, the British beverage giant that is at the center of a major financial scandal stemming from its takeover last spring of Distillers Co., admitted Jan. 16 that it had been involved with Bank Leu AG of Switzerland in an illegal sharebuying operation last spring

The operation would have driven up the price of Guinness shares and

Merc to Increase **Futures Margins**

CHICAGO - The Chicago Mercantile Exchange said Tuesday that it would increase margin requirements for futures contracts based on Stan-dard & Poor's 500-stock index. The move reportedly was made in response to Friday's volatile stock market trading. In February the margin, the amount of cash traders must put down for each contract, will

made the offer of cash and shares to Distillers more attractive.

Under British corporate law, it is illegal to offer financial inducements, such as indemnities against loss, as a means of manipulating a company's stock prices.

A spokesman for Zentralsparkasse, Helmut Roubin, said the payment to his bank followed a short-term investment in Guinness shares last spring. "The transaction was in no way

illegal or improper according to the provisions of Austrian law and the bank was not aware that the matter possibly constituted a breach of any British law," Mr. Roubin said, reading from a statement.

He said that "the volume of the the bank's share portfolio. It is, say that the transaction was illegal.

a payment of 254,000 sterling was made by Guinness to the bank." He said that Zentralsparkasse, a leading Austrian savings bank, sold the shares a few weeks later at a loss and that the Guinness payment was a "compensatory payment"

Zentralsparkasse had informed the authorities in Britzin and Austria of the payment, according to Mr. Roubin. The share transactions had been carried out on the London Stock Exchange.

Results of the inquiry, which could be completed next week, will be made available to British and Austrian authorities, Mr. Roubin said. He said that the payment had not been returned to Guinness and that it would be decided next week investment was well within the nor- whether to do so. That probably mal range of share transactions for would be done if British authorities

Kodak to Take **Higher Charge**

ROCHESTER, New York — Eastman Kodak Co. said Wednesday that it would take a higher-than-expected charge of about \$1 a share on 1986 earnings for its program to reduce the work force by 10 percent. It previously estimated a

fourth-quarter charge of \$16 million, or 7 cents a share, for the program. The company re-ported earnings of \$2.8 billion in the fourth quarter of 1985.

Kodak attributed the higher charge to "the large number of employees leaving the company in the fourth quarter and a lar-ger-than-anticipated departure of higher salaried people."

month after becoming chairman of J. Walter Thompson Co., the ad-

Toshiba's High-Tech Plans **Get Mixed Analysts' Reviews**

By Linda Sieg

TOKYO - Toshiba Corp., buoyed by its recent successes in the semiconductor field, plans to move further from its traditional reliance on heavy electrical equip- of sales to maintain its thrust into ment and into information process- new areas. ing and telecommunications. But analysts are divided over whether

the strategy will work.
People said we were weak in tal investment and became strong."
Toshiba's president, Sugiichiro Watari, said in recent interview. "Now we're doing the same for information processing and telecommunications and we expect the same results."

In 1985, Toshiba became the first company to mass-produce the one-megabit dynamic random ac-cess memory, or DRAM, chips, that heralded the next generation of computers. The move boosted Toshiba to third place worldwide

among microchip makers. That success improves Toshiba's prospects for the future, industry analysts say. But they point out that the company faces problems on two fronts: its relative lag in key technological areas and the battering its profits have taken from the

strong yen.

Mr. Watari conceded that the nology.

(Continued from first finance page) ward meeting shortly on stabilizing

exchange markets. He also indicated that Japan would cut its discount rate soon something he has said would not happen until after a G-5 meeting.

Mr. Sumita's statements seemed to buttress remarks by Finance Minister Kiichi Miyazawa last week that he and his U.S. counterpart, James A. Baker 3d, bad agreed to work for an early G-5

Japan and West Germany are the strongest critics of the U.S. policy of letting the dollar drift, because their goods have become more expensive and their export industries bave suffered

But in West Germany, the Rundesbank said it was not aware of any planned G-5 meeting, while in New York, a U.S. Treasury official also denied the rumors. And in Paris, the French finance minister. Edouard Balladur, said that while he would back a G-5 meeting, none

News reports said earlier this week that a meeting had been scheduled for Feb. 7 in Paris. Dealers attributed the dollar's

seakness largely to expectations that U.S. economic data scheduled for release this week would be me**London Dollar Rates** Devische mart Pound sterling 1.7845 1.5390 151.55 1.5010 3.9688

diocre or negative. These include durable-goods orders and trade figures for December.

The dollar's recent downturn began last month, with the announcement that the U.S. trade deficit for November was a record \$19.2 billion, much more than had been expected. Several top administration officials have said since then that they expect little improvement

in the December figures. Dealers said that President Ronald Reagan's State of the Union address on Tuesday, by failing to mention the dollar, had reinforced the prevailing belief that his aides were willing to let the currency fall

Mr. Reagan asked Congress Tuesday for wide measures to make American goods more competitive, but did not mention the dollar. The administration is under huge pres-sure to help narrow the trade defi-

taled around \$174 billion last year. Traders said the markets were now eager to sell dollars to test central banks' willingness to intervene in support of the currency.

But dealers said the 150-yen level remained a key support point for the dollar, and rumors circulated that the U.S. Federal Reserve had intervened in Tokyo trading to help the Bank of Japan protect the year. Ever since the dollar begin its sharp slide a few weeks ago, the

brake its decline has been uppermost in participants' minds. In Tokyo, where trading ends before the European day begins, the dollar fell to 150.90 yen from 152.65 on Tuesday.

sibility of central hank action to

In New York, the rumors of central-bank intervention helped the dollar to recover slightly from a plunge in early trading.

It also got a boost from rumors that the Fed had asked banks to quote dollar/mark rates.

When the Fed does that, the market immediately takes it as a sign that the Fed is protesting the dollar's current value against a perticular corrency," one dealer explained. "That started the sparks flying."

Prices Mixed as Dollar Continues to Slide

By Norma Cohen

LONDON - Eurobond prices ended mixed Wednesday, with in. interested. vestors sidelined by the dollar's The dol

THE EUROMARKETS

continued steep fall to the lowest levels in more than six years. "The main thing today was the collapse of the dollar," said a trader at a Japanese bank. The U.S. currency fell to about 1.7670 Deutsche marks by midday, and only late 81 basis points over comparable numors that a meeting of the Group of Five industrial nations is imminent rescued it from that level.

Eurodollar bonds ended little touch firmer, traders said.

Traders said that with the dol- that, from the borrower's point of lar's woes coinciding with the U.S. view, makes sense, even with a fall-Treasury quarterly refunding be-ing dollar.

ginning Wednesday, expectations were that interest rates might have to rise to keep foreign investors

The dollar's weakness weighed on the new issues market, although not enough to prevent a Eurodollar bond from Mitsui Trust & Banking Co. The issue, a \$200 million offering of seven-year debt, carries a coupon of 7% percent, a spread of maturity Treasuries. The issue is priced at 1014 and was quoted late

count of 1 11/16. Traders speculated that the Mitchanged, while yen bonds closed a sui offering may have been part of an interest-rate-swap arrangement

Wednesday within its fees at a dis-

Meanwhile, the strength of the yen sparked two new issues. The first, a 15 billion yen offering of seven-year, 5.5 percent bonds from Portugal, was priced at 101%. Late in the day it was trading within its fees at a discount of 1%, traders

However, the other yen offering, a 20 billion yen bond from Christi-ania Bank, did not fare as well, traders said. The issue carries a coupon of 5 percent and was priced at 101%

"Christiania Bank has been too frequent a borrower in the last three months," a yen bond trader

Australian dollar issues also firmed slightly, despite the recent glut of new offerings.

MALTER

PHILOSOPHER,

B ERNT ENGELMANN was a schoolboy of 12 when the Nazis came to power in his native Germany. He had been from into a family with strong democratic traditions; he and his mother were planning to move to England in the fall of 1939 (his father had already gone), but they had waited until it was too late. Instead, he spent the greater part of World War II as a radio operator in the Luftwaffe. In 1944 he was arrested, convicted of "abetting Jews," and sent to a concentration camp at Floesenbürg and then, in March 1945, to Dachan; after he was liberated, he started out on a successful career as an author and "In Hitler's Germany," a condensed version

of two volumes that came out in West Germany in 1982 and 1983, is an unusual blend of memoir and oral history. Engelmann recalls his experiences during the Nazi era, compares notes with contemporaries, interviews acquaintances and representative witnesses. The portrait of a society that emerges has many dramatic moments, but it is even more valuable for the way in which it conveys the every-day climate of life in the darkest of dark times. In a number of cases, Engelmann's inter-iewees are allowed to damn themselves out of

their own months, one or two of them at some length. There is the venerable Dr. Barsch, for example, a poet and cultural journalist with a mane of white hair that made him look like the playwright Gerhart Hamptmann ("a resem-blance he cultivated"). In the 1930s he had been a neighbor of the Engelmanns, and until 1933 Engelmann's father had admired his work; then he published an article glorifying the Nazi book-burnings, and shortly afterward divorced his insufficiently Aryan wife.

Mere cowardice? No. by the end of the interview it is clear that Barsch has been exaggerating the dangers to which he was exposed sand that opportunism played a large part in his actions. Engelmann is even unkind enough to quote from one of the poems he wrote in the '30s in order to carry favor with the regime.

Then there is Parent a former Gestary in-

Then there is Berger, a former Gestapo in-terrogator who "simply did his duty." Naturally he doesn't dwell on the fact that his duty included working over prisoners for hours at a time with a length of rubber tubing, but in the midst of his evasions he can't prevent a certain professional pride showing through. After he has pointed out that he never hit anyone unless he was given orders, he panses, "as though ng praise."

With a Berger, or even a Barsch, the moral issues seem clear-cut, but elsewhere the picture tends to be a good deal more messy. We encounter men and women who went along with things half-beartedly, others who were content to get through the day as best they could, still others who succumbed to threats and pressures that few of us can be sure we would have been able to resist.

At the same time there is never any sense of Engelmann playing down the support that Nazism enjoyed, or the sufferings it inflicted. And if he estimates that probably no more than 10 percent of the students and teachers he knew in the 1930s were "real" Nazis, that was still 10

The school he was attending in 1932, for instance, had about 40 Nazis among its 450 pupils. One morning in May of that year they celebrated a Nazi victory in the regional elections with insults and demonstrations that the insults and demonstrations that the principal of the school did nothing to check. At the midday recess, a 12-year-old Jewish boy was badly beaten by four Hitler Youths, "all a head taller and considerably stronger."

There are some heroic scenes in the story, too. In 1935, for instance, Engelmann met the owner of a fashionable tailoring establishment called Desch, and took an instant dislike to him. "He had a face like a carp, with cold, protruding eyes"; he was also a "Supporting Member" of the SS. But Desch turned out to be a key member of a network that managed to muggle hundreds of people out of Germany.

Saving lives in the face of the Nazis' determination to hunt down their victims called for great ingenuity as well as courage, and there are moments in Engelmann's account of rescue activities that sound as though they might have come from a novel, complicated episodes with couriers, codes and disguises.

When one of Engelmann's comrades in France was charged with "aiding the enemy, he had no illusions about what he could expect, and jumped in front of a train. Engelmann is a little vague about the political background of the escape organization, and there are a few other moments in the book when you want to know more than you are told. But there can be no doubt about its being a valuable and absorbing addition to the history of the period.

John Gross is on the staff of The New York

BRIDGE

By-Alan Truscott -- ···

I N the recent Winter Region-al of the Greater New York Bridge Association an imagi-native bid backfired amusingly on the deal shown. Most players with the North hand would be content to raise an opening one-heart bid to four hearts,

but here Tom Snow chose a psychic response of one spade. He was running the risk that his partner, Sue Hobley, would show enthusiasun for spades, but he had two aims in mind. He wanted to inhibit any spade bidding from East-West, who were likely to have a good fit in that suit and could, as it fit in that suit and could, as it turns out, have made nine tricks. He also wanted to discourage West from leading spades eventually, and this proved to be a crucial factor.

North might well have bid the decisive spade lead and defour hearts at his second turn, which would have ended the through North's psychic one-bidding. Instead he probed spade bid? Not at all. As he

with two diamonds, a fourth explained afterward, he had suit bid that allowed East to been fooled into thinking that show diamond strength, and North-South held eight spades suggest a lead, by doubling, between them. He had led a Now South jumped to these spade in the mistaken belief spades, a clear indication that that his partner would ruff: the she had some additional right lead for entirely the strength and 3-5-1-4 distribu- wrong reason.

hearts, knowing that his pert-ner held a singleton diamond and expecting a diamond lead. That lead would have allowed the slam to make, for South would have won, drawn the missing trump, and knocked out the club ace. The spade loser in the dummy would then have been discarded on a club

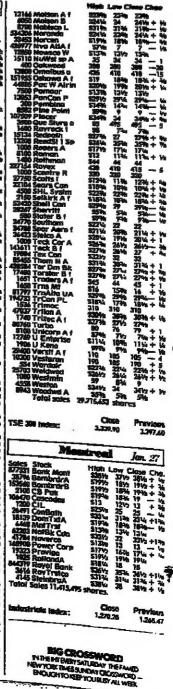

Unfortunately West was also listening to the bidding and knew that South held a singleton diamond. He hit on

mka Fighting Pro Football Names 7 to Hall of Fame

CANTON, Ohio - Running hacks Larry Csonka and John Henn Johnson, quarterback Len Dawcenter him Langer, offensive guard Gene Upshaw and receiver Don Maynard were voted into the Pro Football Hall of Fame on Tuesday.

Fix seven electors, bringing the ranks of the hall to 140, will commiss the largest single group to be national since 1971. For the first time since 1977, three players—Greens, Upshaw and Langer—were inducted in their first year of

dightity.
Conta who rushed for 8,081 pards and 64 touchdowns in his 11gen career, and Langer, who spent most of his 10 pro seasons with himmi, join wide receiver Paul Warfield as selections from the the Dolphins championship years.

The twice as happy to be induct-

ed because Jim Langer is going in with me," said Csonka. "I'm ecstatie for Jun because linemen don't assally get much publicity or many hogors. He's the kind of guy that if you broke his arm and broke his ien he just might say, 'Ouch.' He was e man of actions, not a man of

may words.

A Tie was absolutely critical to my eer. This means a lot more to me hecause one of my guys — Langer, 80b Kuechenberg, Larry Little or 80b Griese — got in the same year

Csonka, 6-foot-3 and 235 pounds (1.90 meters, 106.5 kilogams), was the most valuable play-er in Miami's 24-7 victory over Mianesota in Super Bowl VIII. He payed for the Dolphins in two its, and also saw action for the New York Giants and in the defunct World Football League.

Langer, a 6-2, 253-pounder, was damed on warvers by the Dolphins and went on to be named to the Pro Bowl six times. He played early offensive down of Miami's perfect 1972 season. Greene and Johnson became the

Weather **Disrupts** Ski Meet

CRANS-MONTANA, Switzer-

land — Snow, fog and wind com-bined Wednesday to halt the world Alpine ski championships and force the postponement of the women's combined downhill.

The race was rescheduled for Friday, immediately following the men's combined downhill. The women's combined slalom was to go ahead Thursday as planned.

Along with falling snow, fog at the top of the 2,032-meter (6,660-foot) Mont Lachaux course heightened Wednesday's visibility problems; much of the course takes the skiers through trees. The start of the combined downhill, the first women's race of the two-week championships, was pushed back two hours, but when conditions held, racing was abandoned for the day.

An off day (Feb. 6) is built into the schedule, but continuing bad weather would create a backlog, as happened both at the 1984 Winter Olympics and the 1985 world championships. In both cases, the men's and women's downhills had to be held on the same day.

The Handicapped Find Fresh Hope on the Slopes

By Peter Conradi

Reuters
ENGELBERG, Switzerland --- Briton David Clarke, 26, was paralyzed from the chest down when he was hit by an urban guerrilla's buller in Northern Ireland. American Chad Collet, 42, lost both legs in

But, along with more than 120 other paraplegics and amputees from across the world, male and female, they came to this resort near Lucerne to prove that winter sports are not just for the completely able-bodied.

They spent a week here earlier this month

learning about the latest developments in ski technology, trying out new equipment and taking to the slopes to test themselves competitively.

"It's great to go out with my family and just do something that able-bodied people do," said Collet, who played college football and was a pole-vaulter before serving with the U.S. armed forces in Vietnam.

He started out four years ago on a simple sled - be called it "my bath tub" - but now takes to the piste on a seat mounted by a firm metal spring onto a single ski.
"It's the only sport I can do," said Clarke,

sitting in a more sophisticated monobob, a small fiberglass craft steered and given extra

stability by two small hand-held skis. "And it can be fun — if you get it right."

Switzerland's Paraplegic Association first organized an international meet for handicapped skiers here two winters ago. Since then, the sport has grown worldwide and mpionships have been staged elsewhere.

24 24 24 23- 97

27 21 28 24-186

But the Engelberg event is the only one where paraplegics and experts not only race but meet to discuss handicapped skiers' prob-

This year teams came from as far afield as Japan, Australia, Canada, West Germany, the United States and Britain.

"It occurred to us in 1985 that there had never been an opportunity for people in wheel chairs to learn winter sports," said organizer Andre Deville. "This year the goal was to develop the teaching further and look at ways of preparing people for competi-

Paraplegics and those familiar with their problems agree that winter sports bring enormous benefits, both physical and psychological. Provided the right equipment is used, these activities are no more dangerous than they are for the able-bodied.

"If you have to sit in a wheelchair all the time, then gliding on the snow is something very special," said Caroline Bergenstrom, a trainee physiotherapist from Geneva. "And there is the great advantage that they are not forced into a ghetto with other handicapped

But the problems to be overcome in an environment designed for the able-bodied are

Getting up to the slopes in a wheelchair before fitting into the bob is often a struggle, while boarding the ski lifts requires help and patience from lift operators. Clarke, one of the most seriously handicapped people here, said that if he falls over in his bob, he often cannot right himself again.

Obtaining suitable equipment is a problem. One company, GFL Technik of West Germany, sells a monobob, but it can cost as much as 500 Deutsche marks (\$1,375). Some people - Collet is one - make their own, although

experts say they can often be unsafe. Although no one knows the number of handicapped skiers worldwide, experts here said the sport is obviously growing, taking its place alongside such other, more common. wheelchair sports as basketball and athletics.

It is also becoming more competitive. "Until five years ago, anyone turning up for the U.S. national competitions could just take part, even if they had never skied before," said Collet. "Now you have got to win

a regional championship first."
"Despite the difficulties, it is worth it, it's great fun," said Josef Schwyter, a Swiss mechanic who lost the use of his legs after being

knocked off his motorbike. "My wife, who is able-bodied, always used to go off on skiing holidays, so about two years ago I thought I would too. I bought a bob last year and have been in intensive

training ever since." Like many other skiers here, Schwyter said he usually meets with sympathy from lift operators, although able-bodied skiers often cannot believe their eyes when he hurtles

"Normally they just look oddly at me, but friends skiing behind bear what they say." he

Things like 'He's skiing like a madman' and "What are these people with wheelchairs doing in the mountains, anyway?"

ART BUCHWALD

Double-Dealer Doctrine

WASHINGTON — The new foreign policy of the United States is to feed disinformation to both countries engaged in a war so that neither one can win. It's called the "No-Win Good Neighbor Fairness Doctrine.

The need for such a policy devel-oped when the Iraqis and Iranians

started shooting at each other six years ago and the United States decided it would be a disaster if one of them won.

special working group called "Double Dealer" was set up in a safe

Buchwald house on North Poindexter Street to see it did not happen.

Luke Booney, recently retired from the CIA, the National Security Council, Southern Airways, singlaub's Raiders and the Iranian-American Friendship Society, is in charge of Double Dealer. He said the program is one of the most licated projects the U.S. has ever been involved with.

Booney told me, "It's one thing to see that one side defeats another in war. It's much more difficult to make sure both lose." I said, "No one said being even-

handed in war was a picnic."
"The only thing that keeps us going is that we hate the people running Iran — and we can't stomach those running lraq."

"Recently you gave fran arms to best up on fraq. Aren't you tilting toward the ayatollah?"

RSC Plans 47 Productions

The Associated Press LONDON — The Royal Shake-speare Company has scheduled 47 productions for the 1987-8 season. Jeremy Irons will repeat his three roles in "The Rover," "The Win-ter's Tale," and "Richard II," as will Jonathan Pryce with his highly praised Macbeth. Five plays by Jean Genet will be staged, among them "The Maids" and "The Balcony." The company will also per-form the British premiere of "Sarcophagus," a play about the Russian nuclear disester at Cher-nobyl written by Vladimir Gubaryov, the science editor of Pravda.

we gave traq top secret satellite photos showing where the Iranian arms were. This is a perfect example of double dealing. It's called playing both sides against the Middle East. The Iranians got arms to kill Iraqis, the Iraqis received intelligence photos to destroy the Iranians, and we got money for the con-

What else does Double Dealer do to keep the war stalemated?" "We provide misinformation to both sides. Recently Iraq was expecting an attack on its border by the Iranians. We misinformed the Iraqis where the Iranians were go-ing to come. The Iraqis prepared their defense in one place and the

Iranians attacked in another." "How did you guarantee that the Iranians wouldn't gain the upper hand?"

"We sold them faulty arms so when they attacked their missiles would fail. Because of our reliable disinformation no one got anywhere. Excuse me, I have to send a telex to Teheran informing them that Baghdad is going to overrun

"That's not true, is it?," I asked "Of course not, but it might slow down the fighting in Basra. We don't want the Iranians to win in Basra because it will only encourage them to keep fighting. The Fairness Doctrine requires that both sides get so exhausted they ask us to be the peacemakers."

"Is this the first war the U.S. ever got involved with in which we

dn't want anyone to win?"
"There have been others, but this is the first one which we've taken such an active role. The reason why is because we have both Iran's and Iraq's best interests at heart."

"I read the other day that Iraq claims the disinformation you gave them produced a disastrous defeat for them at the Iraqi seaport of Fao. They're pretty damed mad about it.

"They have nothing to be upset about. Double Dealers are scrupulous about seeing everyone gets a "How can they be sure they're getting equal amounts of disinfor-

Booney said, "They just have to

The Vietnam Demons of Oliver Stone

"I thought it was gonna be a

comeback for me," says Stone. "T

devoted more than a year and a

half on it, really worked at it. And

it was one of the most reviled

films in Hollywood." Stone kept trying to sell "Platoon." But the

answer was always me same:
"Nobody's interested in Vietnam
anymore." "Too depressing."
"After 'Apocalypse Now' and
"The Deer Hunter,' what more

Finally Oliver Stone got fed up.
"This was it," he remembers. "I

was gonna make my last stand. l

wasn't gonna write anymore; I wasn't gonna work in these lousy

deals I've gotten into with lousy

producers, and I've worked with

quite a few lousy producers. I just wanted my independence. And I had the good fortune of running

At the time he met Stone, Da-

ly's company, Hemdale, was most notable for "The Terminator,"

into John Daly at that time."

can you say?"

wer was always the same:

Washington Part Service
NEW YORK — Blunt fea-tures. Hard man in a soft

lay back. You have to be chilly, says Oliver Stone. In regarding this advice, consider the source, who:

· volunteered for combat duty accepted a Golden Globe Award (for writing "Midnight Express") with a tirade demand-

ing changes in U.S. drug laws;

• felt "refreshed" making his
film "Salvador" because "I got
the exact feeling of Saigoo 1965 in

Stone has deftly promoted and positioned "Platoon," his latest film, a fictional Vietnam memoir, for an Oscar nomination, and it seems a good bet.

He has done everything he can to make sure that "Platoon," unlike "Salvador," isn't buried in the marketniace.

But the care Stone has devoted to "Platoon" stems from more than his usual obsessiveness. more than the fact that it took a decade of persistence to get it made, more than the political commitment that, in Stone's eyes, makes the movie an antidote to "Top Gun." By making "Platoon," Stone put some of his de-

mons to rest.
In 1976, "Platoon" was Oliver
Stone's calling card. The script
impressed the executives at Cohumbia sufficiently to assign him "Midnight Express," a low-bud-get picture at the tail end of their annual slate.

annual state.

Stone's script was vivid, well built and ruthless, and "Midnight Express" was a surprise success. Stone, a drifter who had been driving a cab the year before, won a Writer's Guild Award and an Octate of Parts Part

Oscar for Best Screenplay.

"It's like winning the lottery,"
Stone says. "I was a Golden Boy
for a few weeks there, a few write screenplays for them." What was the Golden Boy like?

"I was pretty wild in those days,"
Stone recalls, "I was doing a lot of drugs. I was drinking. I was a bachelor, so I was chasing everysults weren't exactly as Stone had thing that was walking every- planned

Vietnam completely deadened me and sickened me,' the maker of 'Platoon,' says. Tcame back very mixed up, very paranoid and very alienated.'

thing. Including bosses' wives. Which is a big mistake to do. Not playing the Hollywood game, which is basically like the butler in the old mysteries, just come and go quietly, just write."

Stone frittered away the Oscar momentum, making an exercise in horror called "The Hand," starring Michael Caina.

"I went from being very hot to being very cold," Stone recalls. "I value the experience, because you see who your friends are, if you have any. Who returns your phone calls. I got a crash education in Hollywood in about a year, put it that way. And it was

So began Stone's odyssey as a writer for hire. "I left L.A.," he remembers. "I cut drugs out completely. I wanted to restructure my life; I wanted to leave L.A., I wanted to get out of that whole lifestyle that I had been in."

"I knew that my scripts were James Cameron's 1984 sciencefor a few weeks there, a few mot as good; they were starting to months. I was meeting all kinds of get flatter. I wasn't right in my big actors; they wanted me to own skin. So I got married, and Stone went to Daly with the script for "Salvador" and the kind of offer a producer can't refuse my wife and I both tried to sort of Stone would direct it for no fee.

> The movie got a tremendous response from some critics. It's doing well now in videocassette. And it was a big hit on the pri-

vate-screening circuit in Holly-

Stone says, "I didn't make a dime from the movie," he says. "I ended up losing some \$17,000." Stone got something more out of "Salvador," though. At long last, he got the chance to make

Oliver Stone dropped out of Yale to join the infantry and fight

His father was a stockbroker, an extremely conservative Republican who had served as a colonel with Eisenhower's staff in World War II.

His mother was a French Roman Catholic. His father was Jewish, a New York provincial; his mother was a worldly, soph cated woman who, later in life, would hang out with younger people and hold court in Studio 54.

"She'd always get me to play hooky so I could accompany her to the movies," Stone remembers of his youth. "Double features,"

Stone was a troublesome teenager, but he didn't rebel against his father's politics. "I was very gung-ho," he recalls. "I supported Goldwater in '64. My dad was a very strong believer in Republi-can principles."

with a bullet in the neck, later

with shrapped in the legs and buttocks. He learned to be a soldier, and he learned to bully the Viet-namese. And he learned disilla-

Sonment.

"Vietnam completely deadened me and sickened me," Stone says.

"But I don't think I came back in any sense a radical. I came back very mixed up, very paranoid and very alienated.

"Basically I was drifting around for a period of time, doing a lot of drugs, a lot of acid, and really kind of at a loss in my life. Not really going anywhere, not knowing what to do. I was really

Fight years after Stone got out of Vietnam, he wrote "Platoon" to get Vietnam out of Stone.

The first cycle of Vietnam movies — "Apocatypse Now," "The Deer Hunter," "Coming Home" — were made for the people who stayed home. The second cycle — "Uncommon Valor," "Rambo,"
"Missing in Action" — were
made for the people who stayed
home, but wished they had gone.
"Platoon" inaugurates a third

cycle of Victnam movies, includ-ing Stanley Kubrick's "Full Metal Jacket" (due later this year) and Hamburger Hill," written by another veteran, James Karabatsos. But "Platoon" is the first Viet-

nam movie made by someone who actually fought there, and the result, in Stone's words, is to "put the viewer in the war, to make him a participant. To understand what the boys went through over there. And to say, 'Never again.'

"When it actually was fin-ished," Stone says of "Platoon," "I said, Boys, that was the best day I've had since I returned from Vietnam.' That, maybe the day I got married, the day I had my

"But it certainly was one of the best days of my life, that morning in the Philippines. All-night shoot, 54th day, finished on schedule. And I remember driving back alone with a driver to Manila, two-hour drive. And I remember all the fields, and the all the peasants coming out to work in the first light of dawn, and the water buffalo. I felt I'd done something, I'd achieved

I was complete.

Joan Collins's Husband Seeks Alimony Payment

The estranged husband of Jes Collins will seek monthly supply of five figures from her in divort proceedings, his lawyer said. "Ve don't have a ligure yet, because we don't have all the information." Frank Steinschriber said. "But it will be in the five-figure range," meaning at least \$10,000 a month. The British actress, who earns \$1.5 million a year playing the elegant, bitchy Alexis Carrington in the "Dynasty" television series, filed a divorce petition against Peter Holm, her fourth husband, las' month. Her previous marriages al ended in divorce.

Former President Jimmy Carl dedicated research facilities at it presidential library in Atlanta, opening more than six million pa-pers from his administration to the public, the first of about 27 million: pages of documents that eventually will be available. Carter said at a ribbon-cutting ceremony that 99.9 percent of the documents from his presidency will be available for pe-

Jacky Fréon, chef at the Hotel Lutetia in Paris, won the first Gold-en Bocuse cooking award in Lyon, beating out 19 other culinary artists from as far away as Japan. He dazzled the jury in the finals by whipping up in less than four hours a chicken dish called fine volaille de France aux richesses de France and walked away with the \$10,000 fet ic. prize and a trophy named after colchrated chef Paul Bocose.

The singer and songwriter Billy Joel was honored by the Congressional Arts Caucus for "his outstanding contribution to our cul-tural legacy." The annual award by the cancus, composed of nearly 200 House and Senate members who are supporters of the arts, was presented to Joel at a Capitol Hill huncheon in Washington by the caucus chairman, Representative Thomas J. Downey, Democrat of New York.

Paul Newman, who enjoyed criti-cal success in "The Color of Money" for Walt Disney Pictures' louchstone Films, has signed a three-year contract with the company for movie development and
